The Merchant of Venice - William Shakespeare 2003-04-28

The New Cambridge Shakespeare appeals to

students worldwide for its up-to-date scholarship and emphasis on performance. The series features line-by-line commentaries and textual notes on the plays and poems. Introductions are regularly refreshed with accounts of new critical, stage and screen interpretations. This second edition of *The Merchant of Venice* retains the text and Introduction prepared by M. M. Mahood and features a new introductory section by Charles Edelman. Where Mahood focuses in her Introduction on the expectations of the play's first audience and on our modern experience of seeing and hearing the drama performed, Edelman explores the play's sexual politics. He also foregrounds recent scholarship on the position of Jews in Shakespeare's time and surveys the international scope and diversity of theatrical interpretations of the text in the 1980s and 1990s. He pays particular attention to the ways in which directors and actors tackle the troubling figure of Shylock.

The History of Alternative Test Methods in Toxicology - 2018-10-20

The History of Alternative Test Methods in Toxicology uses a chronological approach to demonstrate how the use of alternative methods has evolved from their conception as adjuncts to traditional animal toxicity tests to replacements for them. This volume in the History of Toxicology and Environmental Health series explores the history of alternative test development, validation, and use, with an emphasis on humanity and good science, in line with the Three Rs (Replacement, Reduction, Refinement) concept expounded by William Russell and Rex Burch in 1959 in their now classic volume, *The Principles of Humane Experimental Technique*. The book describes the historical development of technologies that have influenced the application of alternatives in toxicology and safety testing. These range from single cell monocultures to sophisticated, miniaturised and microfluidic organism-on-a-chip devices, and also include molecular modelling, chemoinformatics and QSAR analysis, and the use of stem cells, tissue engineering and hollow fibre bioreactors. This has been facilitated by the wider availability of human tissues, advances in tissue culture, analytical and diagnostic methods, increases in computational processing, capabilities, and a greater understanding of cell biology and molecular mechanisms of toxicity. These technological developments have enhanced the range and information content of the toxicity endpoints detected, and therefore the relevance of test systems and data interpretation, while new techniques for non-invasive diagnostic

imaging and high resolution detection methods have permitted an increased role for human studies. Several key examples of how these technologies are being harnessed to meet 21st century safety assessment challenges are provided, including their deployment in integrated testing schemes in conjunction with kinetic modelling, and in specialized areas, such as inhalation toxicity studies. Traditions & Encounters - Jerry H. Bentley 2020

"This is History Book. It explored the grand scheme of world history as a product of real-life human beings pursuing their individual and collective interests. It also offered a global perspective on the past by focusing on both the distinctive characteristics of individual societies and the connections that have linked the fortunes of different societies. It has combined a clear chronological framework with the twin themes of traditions and encounters, which help to make the unwieldy story of world history both more manageable and more engaging. From the beginning, Traditions & Encounters offered an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times"--

Lord of the Flies - William Golding 2003-12-16

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.
