Core Curriculum for Neonatal Intensive Care Nursing - E-Book -

AWHONN 2014-04-22

Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

Organizational Video-Ethnography Revisited - Sylvie Grosjean 2021-03-05

This book explores the undeveloped potential of video-ethnography to study the material, embodied and sensory dimensions of workplace practices. With the growing interest in sociomateriality and the development of research on the embodied and sensory dimensions of organizational practices, some methodological challenges of this type of research need to be addressed. The main purpose of this book is to present various forms of video-ethnography that make organizational phenomena visible and help better appreciate the organizing properties of bodies, affects, senses and spaces in workplace practices. To do so, illustrative cases based on video-ethnography was discussed to

understand how experiential and unspoken ways of knowing produced through a video-based approach can be made meaningful and relevant to study the material, embodied and sensory dimension of work practices. This book is addressed to researchers and students in social sciences and organizational studies and offers a methodological reflection on how to study the material, embodied, and sensory dimensions of organizational life.

Black Man in a White Coat - Damon Tweedy 2015-09-08

"When Damon Tweedy first enters the halls of Duke University Medical School on a full scholarship, he envisions a bright future where his segregated, working class background will become largely irrelevant. Instead, he finds that he has joined a new world where race is front and center. When one of his first professors mistakes him for a maintenance worker, it is a moment that crystallizes the challenges he will face throughout his early career. Making matters worse, in lecture after lecture the common refrain for numerous diseases resounds, "More common in blacks than whites." In riveting, honest prose, *Black Man in a White Coat* examines the complex ways in which both black doctors and patients must navigate the difficult and often contradictory terrain of race and medicine. As Tweedy transforms from student to practicing physician, he discovers how often race influences his encounters with patients. Through their stories, he illustrates the complex social, cultural, and economic factors at the root of most health problems in the black community. These elements take on greater meaning when Tweedy finds himself diagnosed with a chronic disease far more common among black people. In this powerful, moving, and compassionate book, Tweedy deftly explores the challenges confronting black doctors, and the disproportionate health burdens faced by black patients, ultimately seeking a way forward to better treatment and more compassionate care.- For readers of Atul Gawande, Sandeep Jauhar, Pauline W. Chen, and Henrietta Lacks"--

So you want to be a brain surgeon? - Lydia Spurr 2022-04-12

A medical degree opens many doors, but how do you decide which is the right one to go through? Whether you are wondering how to choose a career or want to know how to follow a particular path, you'll find the answers in this book. Deciding which medical career to pursue has a huge impact on your future, and yet few doctors or medical students ever receive formal careers advice. Fortunately help is at hand: this book has been fully rewritten to include the latest information on training and career progression, as well as summaries of over 100 different careers open to medical graduates. Whether you aspire to be a general practitioner, medical manager, forensic pathologist or even a brain surgeon, you'll find details on the job, lifestyle, and specific career route. Each career chapter has been written by specialists in their field to give you a unique 'insider's opinion', resulting in the most complete and up to date medical careers guide ever published. Alongside the careers chapters there are new and updated sections on the Foundation Programme, Core Training, Specialty Training, and Academic Training. These describe the major hurdles in each area and how to overcome them. In addition, alternatives and adaptations to formal training are explored, including taking time out, working outside the UK, and working less than full time. From choosing jobs and filling application forms, to interviews and improving your CV, this book covers every aspect in detail.

Conflict and Catastrophe Medicine - James M. Ryan 2014-01-13

The first edition of conflict and catastrophe was produced in 2002 and a second, successful edition, followed in 2009. The decision to produce these works sprung from painful problems experienced by colleagues and authors themselves during many humanitarian and related deployments. The guide for both editions was to provide, in one volume, an entry level text covering all aspects of deployment, with an emphasis on medicine and healthcare in these environments. This third revised, expanded and updated edition of Conflict and Catastrophe Medicine: A Practical Guide follows its successful predecessors in providing a framework for use by health professionals visiting a resource constrained environment. Encompassing problems brought about by local conflict or natural disasters, the book covers preparation, organisation, logistics, treatment of major trauma and medical emergencies, and the special problems of delivering medicine in a hostile environment. This book comprehensively tackles: Self-preparation of health professionals to face a range of medical and related problems which occur in hostile and remote environments; War and disaster medicine, covering acute management, rehabilitation, reconstruction and prevention; Bridging the fields of medicine, nursing, international relations, history, politics and economics. The book also touches on nutrition, infection, trauma, psychiatry and psychological medicine and training.

Psychiatry P.R.N - Sarah Stringer 2020-05-07

Loved and recommended by medical students, the second edition of Psychiatry PRN: Principles, Reality, Next Steps is an undergraduate textbook, a guide to working with patients and an OSCE revision tool all in one. Each psychiatric disorder is illustrated with key facts, tips, and case studies which bring diagnostic criteria and symptoms to life. Unique illustrations convey the patients lived experiences and give real insight into psychiatric conditions. With empathy, professionalism, and pragmatism, the authors guide the reader on how to approach patients, what to do, and what not to do. Each section ends with step-by-step questions to ask patients both in real life and in OSCE exams. Praised for its accessible and clear writing style, this guide covers everything you need to take comprehensive psychiatric histories from patients with a variety of psychopathologies. Supporting videos illustrate clinical skills for placements and to prepare for exams. Small enough to carry around Psychiatry PRN gives medical students everything they need for life on the wards. It is also highly useful for student nurses, social workers, and OTs.

Modernising Medical Careers - House of Commons - Health Committee 2008-05-08

The Modernising Medical Careers (MMC) programme of work was established in 2003 to address difficulties in poor training and indifferent career prospects experienced by some doctors at Senior House Officer (SHO) level and by many of those in Staff Grade and Associate Specialist

(SAS) posts. A new Foundation programme was introduced in 2005, the Specialty Training system was reformed and the SHO grade scrapped in 2007. As a result of inadequate preparation during the implementation of the reforms, in 2007 the MMC programme plunged into crisis. The new centralised recruitment system, the Medical Training Application Service (MTAS), proved highly unpopular with both candidates and assessors. A major inquiry, led by Sir John Tooke, examined the 2007 crisis and called both for major changes to the structure of training and for the creation of a new body, NHS Medical Education England, to oversee medical education. The Committee's investigation finds that a divided and inappropriate governance structure, flawed project and risk management and poor communication with junior doctors were the most serious failings. Co-ordination between the Department of Health and the Home Office on restricting medical migration was inadequate. These practical shortcomings were responsible for some of the direct causes of the 2007 crisis, including the defective application form and other aspects of the short-listing process, the unsafe computer system and the failure to limit the number of applications from overseas doctors. The leadership shown by the Department of Health was inadequate. The Chief Medical Officer chose not to take on a clear leadership role and thus did not accept responsibility for the 2007 crisis. The Committee makes a number of recommendations for change and improvement to achieve a more flexible training system, and calls on the Department to address policy issues relating to the wider medical workforce.
