*273 technical questions and answers for job interview Offshore Oil & Gas Platforms* - PETROGAV INTERNATIONAL

This book offers you a brief, but very involved look into the operations in the exploitation of Oil & Gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the production process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview of the phases, operations and terminology used on offshore production platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

*Training for job interview Offshore Drilling Platforms* - Petrogav International Oil & Gas Training Center 2020-06-28

The job interview is probably the most important step you will take in your job search journey. web addresses to 205 recruitment companies where you may apply for a job. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

*Commercial Due Diligence* - Peter Howson 2016-05-23

Commercial Due Diligence (CDD) is about telling the difference between superior businesses and poor businesses, which is why this book is a mixture of business strategy, marketing analysis and market research. However CDD is not about the bland application of analytical techniques, it's about understanding how businesses and markets work and what is really important for profits and growth. Commercial Due Diligence is written by someone with over 25 years' experience of practical strategic analysis who nonetheless has a strong academic grounding. For the first time here is a book that deals with the essentials of strategic analysis with the practitioner's eye. If you are in the business of formulating company strategy, and you want to see how to apply the theories and understand in practical terms what works, when, and what can go wrong, this is the book for you.

On the process of maintenance decision-making in the offshore operational environment of the oil and gas industry - Mario Marcondes Machado 2022-07-08

The overall objective of this research is to develop a decision support framework for preventive maintenance program implementations in the offshore operational environment of the oil and gas industry. The author investigates the problems surrounding the maintenance decision-making process, which elements are systematically identified and categorized, including organizational aspects. The interface with operations is considered in order to promote integration between maintenance and production schedules. The research subjacent objectives have been to identify, among major oil and gas offshore operators, the state-of-practices regarding the maintenance decision-making process and identify, in the literature, the main techniques used for maintenance decisions and optimization in order to propose alternatives for supporting future implementations. Through a Systems Engineering approach, assisted by a literature review, interviews with experts (in Norway and in Brazil), an on-line survey and case studies, the results of this research complement a toolkit for maintenance engineers and managers aiming to facilitate information sharing and interdisciplinary cooperation in the operational environment. Among the results: A concept map for the maintenance decision-making process ontology; A plan for PM program implementations; The suggested cross-sector solution: the minimum equipment list; A Markovian dependability nomogram; and A Markov decision model application.
