A Chair for My Mother - Vera
B. Williams 2021-09-07

This classic and heartwarming
picture book was written and
illustrated by the celebrated
Vera B. Williams and was
named a Caldecott Honor Book
by the American Library
Association. "A tender
knockout. It's rare to find much
vitality, spontaneity, and depth
of feeling in such a simple,
young book."—Kirkus Reviews
Vera Williams tells of a young
girl who, along with her
waitress mother, saves coins in
a big jar in hopes that they can
someday buy a new chair for
their apartment, the kind of
chair her mother deserves after

being on her feet all day in the Blue Tile Diner. Into the jar also goes the money Grandma saves whenever she gets a bargain at the market. There hasn't been a comfortable place to sit in the apartment since a fire in their previous apartment burned everything to "charcoal and ashes." Friends and neighbors brought furniture to their new apartment downstairs, but no one brought anything big or soft or comfortable. Finally the jar is full, the coins are rolled, and in the book's crowning moment, mother, daughter, and Grandma search four different furniture stores, and after carefully trying several chairs, like Goldilocks, they find the chair they've been dreaming of at last. Vera Williams enhances this story about family, community, and the power of working together toward a common goal with her signature folk art-inspired paintings. *A Chair for My Mother* has sold more than a million copies and is an ideal choice for reading and sharing at home and in the classroom.

"A superbly conceived picture book expressing the joyful spirit of a loving family."—The Horn Book
Vera B. Williams's beloved picture book favorites include: "More More More," *Said the Baby*, *Amber Was Brave*, *Essie Was Smart*, *A Chair for Always*, *A Chair for My Mother*, *Cherries and Cherry Pits*, *Music for Everyone*, *Something Special for Me*, *Stringbean's Trip to the Shining Sea*, *Three Days on a River in a Red Canoe*

Excellent 11 - Ron Clark
2004-08-01

When *The Essential 55* was published, Ron Clark became a tireless promoter, traveling the country to speak to large groups of teachers and fans. And when his Oprah appearance shot the book onto the New York Times bestseller list, he kept the heat on. We can expect the same tenacious commitment to promoting his follow-up book, *The Excellent 11*. *The Excellent 11* contains eleven sections, with each one

focusing on a theme directly related to teaching and raising children. Ron Clark draws from his own experience to give advice, telling personal stories that demonstrate the significance of each theme within the learning environment--an environment that extends beyond the classroom and into the larger world. Using themes ranging from Adventure, Ingenuity, and Humor to Dedication, Creativity, and Love, Clark provides a road map for both parents and teachers who want to enrich their children's learning experiences.

High school algebra, grades 9-12.

Danse Macabre - Stephen King 2011-03-01

From the author of dozens of #1 New York Times bestsellers and the creator of many

unforgettable movies comes a vivid, intelligent, and nostalgic journey through three decades of horror as experienced through the eyes of the most popular writer in the genre. In 1981, years before he sat down to tackle *On Writing*, Stephen King decided to address the topic of what makes horror horrifying and what makes terror terrifying. Here, in ten brilliantly written chapters, King delivers one colorful observation after another about the great stories, books, and films that comprise the horror genre—from Frankenstein and Dracula to *The Exorcist*, *The Twilight Zone*, and *Earth vs. The Flying Saucers*. With the insight and good humor his fans appreciated in *On Writing*, *Danse Macabre* is an enjoyably entertaining tour through Stephen King's beloved world of horror.

The World in the Head -

Robert Cummins 2010-01-28

The World in the Head collects the best of Robert Cummins' papers on mental representation and psychological explanation.

Running through these papers are a pair of themes: that explaining the mind requires functional analysis, not subsumption under "psychological laws", and that the propositional attitudes—belief, desire, intention—and their interactions, while real, are not the key to understanding the

mind at a fundamental level. Taking these ideas seriously puts considerable strain on standard conceptions of rationality and reasoning, on truth-conditional semantics, and on our interpretation of experimental evidence concerning cognitive development, learning and the evolution of mental traits and processes. The temptation to read the structure of mental states and their interactions off the structure of human language is powerful and seductive, but has created a widening gap between what most philosophers and social scientists take for granted about the mind, and the framework we need to make sense what an accelerating biology and neuroscience are telling us about brains. The challenge for the philosophy of mind is to devise a framework that accommodates these developments. This is the underlying motivation for the papers in this collection.
