From an Art to a Science of Psychoanalysis - Harry M. Anderson MD D. Psych Frcp 2011

Think of it. When our car breaks down and we take it for repair, we want a mechanic who has a scientific basic knowledge of its parts and internal operations. We also want one who can find our particular problem. We worry if we see that his(her) own vehicle is in disrepair. And if he misperceives our badly-behaving beast and takes a dislike to it, we worry more. And if the vehicle is our mind, and the service person a mental health specialist, and we come late and surly for our initial appointment, we want him(her) to realize that he has just witnessed the first sign of its malfunction. Of course a friendly relationship would be welcome, but that is not our primary desire. With deep and lovely years to spend and miles to go before we end, it's reliable transportation we're after. So is it impossible to achieve a level of expertise that could help us get it? Yes, there are differences. The human mind was not conceived and built by an engineer who could rhyme off its intricacies at will. But scientific clinical studies of its after-creation states could lead to such. Botanists and zoologists have developed testable theories of phenomena that they did not produce. During his medical training, Dr. Harry M. Anderson was inspired by the apolitical curiosity, courage, and determination of the scientists he encountered, and he carried their example into a career in the psychoanalytic domain. It led him to test the definability of its concepts and the predictive capability of its principles, and methods for

doing so during treatments were developed. Some held up to validation procedures while others did not, and a reliable body of theory began to emerge from the work. As it proved repeatedly accurate in sessions with patients, he applied it in a parallel analysis of self after his training analysis. Then, new research data emerged from several sources to expand its range, and as the roots of some of life's most severe symptoms were reached and dismantled, the goal of providing "complete analyses" became more than possible. It also became apparent that unsuspected artistic creative potentials could be released in self and others; and that theoretically-informed analyses could create extensive ripple effects in families, career situations, marriages, and friendships. None of his specific research was planned, but retrospective notations revealed that each had followed naturally upon the one before. Initial offerings had energized the curious part of his mind and pulled the rest of it with them.

Crisis and Institutional Change in Regional Integration - Sabine Saurugger 2016-03-31

Comparative regional integration has met with increasing interest over the last twenty years with the emergence or reinforcing of new regional dynamics in the EU, NAFTA, MERCOSUR and ASEAN. This volume systematically and comparatively analyses the reasons for regional integration and stalemate in European, Latin American and Asian regional integration. It examines whether regional integration systems change in crisis periods, or more precisely in periods of economic crises, and why they change in different directions. Based on a neo-institutionalist research framework and rigorously comparative research design, the individual chapters analyse why financial and economic crises lead to more or less integrated systems and which factors lead to these institutional changes. Specifically it addresses institutional change in regional integration schemes, power relations between member states and the institutions in different policy domains, and change in individual or collective citizens' attitudes towards regional integration. Adopting an actor-centred approach, the book highlights which regional integration schemes are influenced by economic and financial crises and how to explain this. This text will be of key interest to scholars, students and policy specialists in regional integration, European Politics, International Relations, and Latin American and Asian studies.

The Shias of Pakistan - Andreas Rieck
2016-01-15

The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia- Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class, of religious schools and rivalry between "orthodox" "ulama" and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.
