Tom Bingham and the Transformation of the Law - Mads Andenas 2011

Tom Bingham was among the most influential judges of the twentieth century, having occupied in succession the most senior judicial offices, Master of the Rolls, Lord Chief Justice and Senior Law Lord, before retiring in 2008, at which point he devoted himself to the teaching of Human Rights Law, until his death in September 2010. His judicial and academic work has deeply influenced the development of the law in a period of substantial legal change. In

particular his role in establishing the new UK Supreme Court, and his views on the rule of law and judicial independence left a profound mark on UK constitutional law. He was also instrumental in championing the academic and judicial use of comparative law, through his judicial work and involvement with the British Institute of International and Comparative Law. This volume collects around fifty essays from colleagues and those influenced by Lord Bingham, from across academia and legal practice. The essays survey Lord Bingham's pivotal role in the transformations that took place in the legal system during his career.

Contract Law and Contract Practice -

Catherine E Mitchell 2014-07-18

An oft-repeated assertion within contract law scholarship and cases is that a good contract law (or a good commercial contract law) will meet the needs and expectations of commercial contractors. Despite the prevalence of this statement, relatively little attention has been

paid to why this should be the aim of contract law, how these 'commercial expectations' are identified and given substance, and what precise legal techniques might be adopted by courts to support the practices and expectations of business people. This book explores these neglected issues within contract law. It examines the idea of commercial expectation, identifying what expectations commercial contractors may have about the law and their business relationships (using empirical studies of contracting behaviour), and assesses the extent to which current contract law reflects these expectations. It considers whether supporting commercial expectations is a justifiable aim of the law according to three well-established theoretical approaches to contractual obligations: rights-based explanations, efficiency-based (or economic) explanations and the relational contract critique of the classical law. It explores the specific challenges presented to contract law by modern

commercial relationships and the ways in which the general rules of contract law could be designed and applied in order to meet these challenges. Ultimately the book seeks to move contract law beyond a simple dichotomy between contextualist and formalist legal reasoning, to a more nuanced and responsive legal approach to the regulation of commercial agreements.

Contract Law Minimalism - Jonathan Morgan

2013-11-07

Commercial contract law is in every sense optional given the choice between legal systems and law and arbitration. Its 'doctrines' are in fact virtually all default rules. Contract Law Minimalism advances the thesis that commercial

parties prefer a minimalist law that sets out to enforce what they have decided - but does nothing else. The limited capacity of the legal process is the key to this 'minimalist' stance. This book considers evidence that such minimalism is indeed what commercial parties choose to govern their transactions. It critically engages with alternative schools of thought, that call for active regulation of contracts to promote either economic efficiency or the trust and co-operation necessary for 'relational contracting'. The book also necessarily argues against the view that private law should be understood non-instrumentally (whether through promissory morality, corrective justice, taxonomic rationality, or otherwise). It sketches a restatement of English contract law in line with the thesis.

Commercial Law in the Next Millennium -

Royston Miles Goode 1998

In this book, which reproduces in revised and expanded form the 49th series of Hamlyn

Lectures delivered in Oxford and London in 1997, Professor Roy Goode examines some of the key factors shaping commercial law as we move into the next century. This is not a technical exposition but a bold attempt to capture the very essence of commercial law: its philosophical foundations; the perpetual tension between form and substance and between law and equity in commercial transactions, legal controls and self-regulation of market operations, and the development of new concepts of property and obligation. In this wide-ranging study, which combines the prospective with the retrospective, Roy Goode's stimulating re-analysis of fundamental legal principles and policies raises a series of critical questions about the future direction of our commercial law.

alternative solutions. The success of the School will be measured in the future by its contribution, through research and teaching, to the development of solutions to the difficulties and uncertainties which reduce the effectiveness of international arbitration agreements and awards and the conduct of international arbitral proceedings. This book reproduces the papers presented at the Symposium (amended and varied by several contributors). It is not considered appropriate here to comment on or analyse paper by paper the ideas presented or discussions which ensued. However, it would be appropriate to make reference to specific developments in the short period since the Symposium directly relevant to the papers reproduced and the discussions which ensued. Intermediation and Beyond - Louise Gullifer

2019-01-24

The global shift from the direct holding of securities by investors to the current intermediated holding system raises many important legal issues. These include the impact of the intermediated holding system on the rights of investors, and the enforcement of those rights against intermediaries and issuers. The cross-border nature of many holding patterns adds another layer of complexity to these issues, and reduces legal certainty. Against this, intermediation offers benefits for many investors, including the ability to hold a cross-border portfolio with one intermediary, a reduction in costs and the facilitation of the use

of securities in the collateral, repo, and securities lending markets. This book covers a number of legal topics relating to intermediated securities including the history of intermediation, the benefits and problems in the current intermediated holding system, and how future legal and technological developments could help to resolve these problems while retaining the benefits of intermediation. It also examines the possible impact of FinTech on this area, in particular the potential for Blockchain to be used in the issuing, holding and settlement of securities, the extent to which this will solve some of the difficulties that currently exist, and whether the use of Blockchain will create new difficulties that will need to be overcome. This book, which originated in a series of workshops organised by the Commercial Law Centre at Harris Manchester College, Oxford, will appeal to those interested in financial and corporate law, including academics, practitioners, policy makers and students.
