Embedded in the Universal Consciousness - Arno

Grünbauer 2017-11-09

Most people unwillingly limit their awareness to a life as it literally appears before their eyes. Few experience an 'above' in everyday life. But to feel truly connected, to be in it, is different. Are there experiences that surpass human understanding? Yes of course there are! Science begins with trying to picture something you want to know

more about: something which is in fact already present in our experience or observation but which apparently causes enough curiosity to investigate further. In order to gain an interpretation of spiritual experiences the necessity of the heart consciousness seems the more obvious choice of instrument. This book is about reclaiming, fully living and sharing your own truth about spiritual experiences. The author, Arno Grünbauer (1964)

has his own practice area in the Netherlands, (Driebergen) named 'dragonPOINT', where he is working with the active energetic processes inside and around the physical body of his clients enhancing mental health.

Non-Violent Resistance -

Haim Omer 2021-05-20

Non-violent resistance (NVR) is an approach for parents and other caregivers that helps to increase presence and overcome impulsive and dangerous behaviors, while reducing conflict and escalation. The practical, evidence-based advice accompanies a detailed list of all the new applications of NVR and an overview of the supporting literature. A step-by-step presentation of the treatment is laid out alongside a useful model on escalation and its prevention. The approach achieves high parent engagement and cooperation, with over twenty controlled studies showing that NVR effectively reduces parental helplessness, parental impulsiveness, parent-child conflicts, and family discord.

[QBO! The Question Behind the Question](#) - John G. Miller

2004-09-09

The lack of personal
accountability is a problem that
has resulted in an epidemic of
blame, victim thinking,
complaining, and
procrastination. No
organization—or
individual—can successfully
compete in the marketplace,
achieve goals and objectives,
provide outstanding service,
engage in exceptional
teamwork, or develop people
without personal
accountability. John G. Miller
believes that the troubles that

plague organizations cannot be solved by pointing fingers and blaming others. Rather, the real solutions are found when each of us recognizes the power of personal accountability. In QBQ! The Question Behind the Question®, Miller explains how negative, ill-focused questions like “Why do we have to go through all this change?” and “Who dropped the ball?” represent a lack of personal accountability. Conversely, when we ask better questions—QBQs—such as “What can I do to contribute?” or “How can I help solve the problem?” our lives and our organizations are transformed. THE QBQ! PROMISE This remarkable and timely book provides a practical method for putting personal accountability into daily actions, with astonishing results: problems are solved, internal barriers come down, service improves, teams thrive, and people adapt to change more quickly. QBQ! is an invaluable resource for anyone seeking to learn, grow, and change. Using this tool,

each of us can add tremendous worth to our organizations and to our lives by eliminating blame, victim-thinking, and procrastination. QBQ! was written more than a decade ago and has helped countless readers practice personal accountability at work and at home. This version features a new foreword, revisions and new material throughout, and a section of FAQs that the author has received over the years.

Spies and Spymasters - Jock Haswell 1977

Bog om spionage gennem tiderne og den måde, hvorpå spionerne drev deres hemmelige og farlige arbejde.

The Last Ocean - Nicci Gerrard 2020-08-11

From the award-winning journalist and author, a lyrical, raw and humane investigation of dementia that explores both the journeys of the people who live with the condition and those of their loved ones After a diagnosis of dementia, Nicci Gerrard’s father, John, continued to live life on his own terms, alongside the disease. But when an isolating

hospital stay precipitated a dramatic turn for the worse, Gerrard, an award-winning journalist and author, recognized that it was not just the disease, but misguided protocol and harmful practices that cause such pain at the end of life. Gerrard was inspired to seek a better course for all who suffer because of the disease. The Last Ocean is Gerrard's investigation into what dementia does to both the person who lives with the condition and to their caregivers. Dementia is now one of the leading causes of death in the West, and this necessary book will offer both comfort and a map to those walking through it. While she begins with her father's long slip into forgetting, Gerrard expands to examine dementia writ large. Gerrard gives raw but literary shape both to the unimaginable loss of one's own faculties, as well as to the pain of their loved ones. Her lens is unflinching, but Gerrard honors her subjects and finds the beauty and the humanity in their seemingly diminished

states. In so doing, she examines the philosophy of what it means to have a self, as well as how we can offer dignity and peace to those who suffer with this terrible disease. Not only will it aid those walking with dementia patients, The Last Ocean will prompt all of us to think on the nature of a life well lived.

Blueprint for Black Power - Amos N. Wilson 1998

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ...

Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).

A Theory of Moral Education -

Michael Hand 2017-11-14

Children must be taught morality. They must be taught to recognise the authority of moral standards and to understand what makes them authoritative. But there's a problem: the content and justification of morality are matters of reasonable disagreement among reasonable people. This makes it hard to see how educators can secure children's commitment to moral standards without indoctrinating them. In *A Theory of Moral Education*, Michael Hand tackles this problem head on. He sets out to show that moral education can and should be fully rational. It is true that many moral standards and justificatory theories are controversial, and educators

have an obligation to teach these nondirectively, with the aim of enabling children to form their own considered views. But reasonable moral disagreement does not go all the way down: some basic moral standards are robustly justified, and these should be taught directly, with the aim of bringing children to recognise and understand their authority. This is an original and important contribution to the philosophy of moral education, which lays a new theoretical foundation for the urgent practical task of teaching right from wrong.

Family Therapy Beyond

Postmodernism - Carmel

Flaskas 2003-09-02

Postmodernist ideas are widely used in family therapy.

However, it is argued that these ideas have their limits in meeting the richness and complexity of human experience and therapy practice. *Family Therapy Beyond Postmodernism*

examines postmodernism and its expressions in family therapy, raising questions about: * reality and realness * the subjective process of truth * the experience of self.

Alongside identifying the difficulties in any sole reliance on narrative and constructionist ideas, this book advocates the value of selected psychoanalytic ideas for family therapy practice, in particular: * attachment and the unconscious * transference, projective identification and understandings of time * psychoanalytic ideas about thinking and containment in the therapeutic relationship.

Family Therapy Beyond Postmodernism offers a sustained critical discussion of the possibilities and limits of contemporary family therapy knowledge, and develops a place for psychoanalytic ideas in systemic thinking and practice. It will be of great interest to family therapists, psychotherapists and other mental health professionals.

When You Say Yes But Mean No - Leslie Perlow 2003-05-20

We live in a culture—especially at work—that prefers harmony over discord, agreement over dissent, speed over deliberation. We often smile and nod to each other even though deep down we could not disagree more. Whether with colleagues, friends, or family members, the tendency to paper over differences rather than confront them is extremely common. We believe that the best thing to do to preserve our relationships and to ensure that our work gets done as expeditiously as possible is to silence conflict. Let's face it, most bosses don't encourage us to share our differences. Indeed, many people are taught that loyal employees accept corporate values, policies, and decisions—never challenging or questioning them. If we want to hold on to our jobs and move up in our organizations, stifling conflict is the safest way to do it—or so we believe. And it is not just with our bosses that we fear raising a dissenting opinion. We worry about what our peers and even

our subordinates may think of us. We don't want to embarrass ourselves or create a bad impression. We don't want to lose others' respect or risk rejection. We often associate conflict with its negative form—petty bickering, heated arguing, a bloody fight. But conflict can also be a source of creative energy; when handled constructively by both parties, differences can lead to a healthy and fruitful collaboration, creation, or construction of new knowledge or solutions. When we silence conflict, we avoid the possibility of negative conflict, but we also miss the potential for constructive conflict. Worse yet, as Leslie Perlow documents, the act of silencing conflict may create the consequences we most dread. Tasks frequently take longer or never get done successfully, and silencing conflict over important issues with people for whom we care deeply can result in disrespect for, and devaluing of, those same people. Each time we silence conflict, we create an

environment in which we're all the more likely to be silent next time. We get caught in a vicious "silent spiral," making the relationship progressively less safe, less satisfying, and less productive. Differences get glossed over, patched over, and suppressed . . . until disaster happens. "Saying yes when you really mean no" is a problem that haunts organizations from start-ups to multi-nationals. It exists across industries, levels, and functions. And it's exacerbated by a down economy, when the fear of losing one's job is on everybody's mind and the idea of allowing conflict to surface or disagreeing with others seems particularly risky. All too often, the conversation at work bespeaks harmony and togetherness, even though passionate disagreements exist beneath the surface. Leslie A. Perlow is a corporate ethnographer, an anthropologist of corporate culture. Anthropologists like Margaret Mead spend years in the field studying exotic cultures. Perlow does the

same, although the field for her is the office and the exotic people are us—those who work in the world of organizations. But the end result is no less surprising or rich in insight. Whether it's a Fortune 500 firm, small business, or government bureaucracy, Perlow provides a keen understanding of the hidden issues behind what people say (and don't say). And more important, she shows how to create relationships where individuals feel empowered to express their genuine thoughts and feelings and to harness the power of positive conflict.

Out of Weakness - Andrew Schmookler 2011-02-23
"A wide-ranging and deeply thoughtful meditation on the psychological sources of the danger to humanity created by the advent of weapons of mass destruction. It draws on a vast range of sources including psychology, anthropology, literature, philosophy, and religion, and is expressed with eloquence and grace."—Dr. Jerome Frank, Professor Emeritus of Psychiatry, Johns

Hopkins Medical School, author of *Sanity and Survival*
"A remarkably thorough analysis of the proposition that is our beliefs, conscious and unconscious, which have made war inevitable—and that a change in those assumptions (including the unconscious ones) can free us from the scourge...This is a very hopeful book about a subject that leads many to despair...I believe it will be a most useful contribution to the dialogue about our national security dilemma."—Willis Harman, President, Institute of Noetic Sciences, author of *An Incomplete Guide to the Future*
The Religion of the Romans - Jörg Rüpke 2007-12-03
The gods were the true heroes of Rome. In this major new contribution to our understanding of ancient history, Jörg Rüpke guides the reader through the fascinating world of Roman religion, describing its unique characteristics and bringing its peculiarities into stark relief. Rüpke gives a thorough and engaging account of the

multiplicity of cults worshipped by peasant and aristocrat alike, the many varied rites and rituals daily observed, and the sacrifices and offerings regularly brought to these immortals by the population of Ancient Rome and its imperial colonies. This important study provides the perfect introduction to Roman religion for students of Ancient Rome and Classical Civilization.

Growing Up in Trust - Justine Mol 2008

Looks at the impact of reward and punishment on children and on the relationship between the children and their parents, teachers and other grown-ups around them. This book describes a world beyond right and wrong, where no one tells children what they should do.

The Giraffe and Jackal Within - Justine Mol

2017-01-02

Marshall B. Rosenberg, the founder of Nonviolent Communication, chose two animals to help convey his ideas with power and clarity: the jackal and the giraffe. They

represent two qualities in us. The jackal is result-oriented, judgmental and authoritarian. The giraffe is both gentle and strong, regarding whatever comes up with kindness, communicating from his heart and seeking connection and clarity. In *The Giraffe and Jackal Within*, Justine Mol makes it clear that it is possible to accept and give space to the jackal, while at the same time, out of a deep desire to contribute to happiness and peace for all, being able to be a giraffe. The giraffe helps the jackal to express himself, so his ruthlessness can transform into compassion. Justine describes the characteristics of the jackal and giraffe sides of us, gives us tips and examples of how people speak in their jackal and giraffe moments. An inspirational book in which the reader can experience what Nonviolent Communication consists of. Justine Mol writes, trains and coaches in the spirit of Nonviolent Communication according to the ideas of Marshall Rosenberg. She has also written *Growing up in*

Trust: Raising Kids without Rewards and Punishment.

_____ THE TOP TEN
BESTSELLER 'Unusually

practical, non-patronising and authentic. Think Marie Kondo for the mind' Sunday Times Wellness pioneers Nadia Narain and Katia Narain Phillips have spent decades helping others to feel their best. But it took them a bit longer to learn to care for themselves. Here they share the small, achievable steps they picked up on a lifetime's journey towards self-care, and how you can apply them to your life, wherever you are. Right now, you may be deep in the waves of life, being tossed around. Learning self-care is like building your own life boat, plank by plank. Once you've got your boat, you'll still be rocked by the same waves, but you'll have a feeling of safety, and a stability that means you can pick other people up on your way.

Tears on the Sand - Maryam Mohammed 2006-07-01

And so the story begins. Stories within a story-a blending of traditions, tragedy and tranquility set in the Dubai of yesteryears-the years of pearl-fishing, moonlight bathing and

curing of illnesses through Holy Breaths blown upon the sick, and also by branding and blood-letting, and of simplicity and innocence rolled out into a documentary type of a novelette. Facts and more facts spiced up and garnished with fiction.

Changing Our Minds - Dr.

Naomi Fisher 2021-02-04

Children are born full of curiosity, eager to participate in the world. They learn as they live, with enthusiasm and joy. Then we send them to school. We stop them from playing and actively exploring their interests, telling them it's more important to sit still and listen. The result is that for many children, their motivation to learn drops dramatically. The joy of the early years is replaced with apathy and anxiety. This is not inevitable. We are socialised to believe that schooling is synonymous with education, but it's only one approach. Self-directed education puts the child back in control of their learning. This enables children, including those diagnosed with

special educational needs, to flourish in their own time and on their own terms. It enables us to put wellbeing at the centre of education. Changing Our Minds brings together research, theory and practice on learning. It includes interviews with influential thinkers in the field of self-directed education and examples from families alongside practical advice. This essential guide will give you an understanding of why self-directed education makes sense, how it works, and what to do to put it into action yourself.

Culture and Reflexivity in Systemic Psychotherapy - Inga-Britt Krause 2018-03-21

The therapeutic relationship is increasingly becoming a central topic in systemic psychotherapy and cross-cultural thinking. Here, experienced systemic psychotherapists offer their reflections and thoughts on the issues of race, culture, and ethnicity in the therapeutic relationship. The aim is to develop this area of systemic

practice, to place culture squarely at the centre of all systemic psychotherapy practice as a model for all psychotherapy practice, to encourage both trainees and experienced systemic psychotherapists to pay attention to race, culture, and ethnicity as central issues in their own and their clients' identities, and to inform researchers who use qualitative research techniques such as ethnography. This book moves the issues of culture, race and equity into the centre of psychotherapeutic practice, including that which involves therapeutic encounters across culture, racial and ethnic divides. It develops an approach to cultural transference and demonstrates that thinking about culture, race and ethnicity does not belong at the margin.

[The Highest Common Denominator](#) - Miki Kashtan 2021-01-12

What if people -- even longtime enemies -- could transform conflicts into dilemmas they feel motivated to solve together and build more connection and trust? What if employees could leave a meeting empowered and with a joint sense of purpose? What if the positive changes community activists are working so hard to see in the world had a lasting impact? In **THE HIGHEST COMMON DENOMINATOR: Using Convergent Facilitation to Reach Breakthrough Collaborative Decisions**, Miki Kashtan introduces a novel decision-making process called Convergent Facilitation that builds trust from the beginning, surfaces concerns

and addresses them, and turns conflicts into dilemmas that groups feel energized to solve together. This highly-effective decision-making process has been used successfully around the world to resolve problems and teach people how to collaborate without sacrificing productivity. Since 2002, Convergent Facilitation has helped organizations, businesses, and governments upend traditional and unproductive decision-making methods, such as majority rule, top-down decision-making and coercion, or consensus, which can drain a group's energy. In 2012, Miki worked with the Minnesota State Legislature to resolve gridlock on child custody legislation and helped stakeholders draft bills that passed nearly unanimously. In a 2014 op-ed in the New York Times, Miki explained how power differences lead employees to stay silent and not feel part of a common goal, which ultimately makes a business run less effectively. THE HIGHEST COMMON DENOMINATOR allows

readers to learn and implement Convergent Facilitation. The book moves readers through three phases of a process that brings groups to outcomes that are profoundly collaborative and genuinely supported by all. Through vivid case studies and practical examples, the book explains: how to guide people towards solutions that integrate everyone's needs and concerns without requiring compromise; how to keep people on track with the task at hand; how to invite dissent and engage with it productively; and how to attend to the power differences that so often interfere with collaboration.

The Secrets of CEOs - Steve Tappin 2008

"The Secrets of CEOs" reveals frank discussions with some of the West's most influential CEOs, such as Tesco's Sir Terry Leahy, Sir Martin Sorrell of WPP Group, former BP chief executive Lord Browne and Ben Verwaayen, formerly of BT. It also incorporates radical and thought-provoking comments from the heads of new corporate champions of

India like Infosys, Tata and Wipro, leading Chinese and Russian companies such as Lenovo and Severstal, and US corporate giants including Google, Dell and News Corporation. This work helps readers to discover what it's really like to be a top CEO, what motivates and drives the world's top business leaders, how they really lead their businesses, the leadership skills and experience that you need to succeed in the new world of work, and how businesses and leaders are going to have to evolve in the future. Being a CEO should be one of the best jobs in the world, offering the chance to make a real difference. But real life for most CEOs is tough and many are finding it very demanding. Steve Tappin and Andrew Cave have interviewed over 150 of the world's leading CEOs at length to discover their thoughts on the reality of leadership, life and business. "The Secrets of CEOs" gives fascinating insights into where today's top leaders have come from and what motivates and

drives them, as well as the best kind of apprenticeship to become a global leader. It also explores the secrets of dealing successfully with the five facts of life that will be critical to business success in the coming decade: profiting from hard globalization; decoding sustainability; surfing the third wave of the web; coping with a capital crunch; and, waging the first world war for talent. How do chief executives really run their businesses? How do they need to change to ensure that their companies are successful and sustainable in the 21st century? And is it possible to have career success and a happy personal life? Discover the answers to these questions and much more in this provocative and stimulating book.

Foundations of Language - Ray Jackendoff 2002-01-24

How does human language work? How do we put ideas into words that others can understand? Can linguistics shed light on the way the brain operates? Foundations of Language puts linguistics back

at the centre of the search to understand human consciousness. Ray Jackendoff begins by surveying the developments in linguistics over the years since Noam Chomsky's *Aspects of the Theory of Syntax*. He goes on to propose a radical re-conception of how the brain processes language. This opens up vivid new perspectives on every major aspect of language and communication, including grammar, vocabulary, learning, the origins of human language, and how language relates to the real world. *Foundations of Language* makes important connections with other disciplines which have been isolated from linguistics for many years. It sets a new agenda for close cooperation between the study of language, mind, the brain, behaviour, and evolution.

[Friday Black](#) - Nana Kwame Adjei-Brenyah 2018

A piercingly raw debut story collection from a young writer with an explosive voice; a treacherously surreal, and, at times, heartbreakingly satirical

look at what it's like to be young and black in America.

[Hip: The History](#) - Mr. John Leland 2009-10-13

Hip: The History is the story of how American pop culture has evolved throughout the twentieth century to its current position as world cultural touchstone. How did hip become such an obsession?

From sex and music to fashion and commerce, John Leland tracks the arc of ideas as they move from subterranean Bohemia to Madison Avenue and back again. *Hip: The History* examines how hip has helped shape -- and continues to influence -- America's view of itself, and provides an incisive account of hip's quest for authenticity. This P.S. edition features an extra 16 pages of insights into the book, including author interviews, recommended reading, and more.

[Stand Firm](#) - Svend Brinkmann 2017-02-27

The pace of modern life is accelerating. To keep up, we must keep on moving and adapting - constantly striving

for greater happiness and success. Or so we are told. But the demands of life in the fast lane come at a price: stress, fatigue and depression are at an all-time high, while our social interactions have become increasingly self-serving and opportunistic. How can we resist today's obsession with introspection and self-improvement? In this witty and bestselling book, Danish philosopher and psychologist Svend Brinkmann argues that we must not be afraid to reject the self-help mantra and 'stand firm'. The secret to a happier life lies not in finding your inner self but in coming to terms with yourself in order to coexist peacefully with others. By encouraging us to stand firm and get a foothold in life, this vibrant anti-self-help guide offers a compelling alternative to life coaching, positive thinking and the need always to say 'yes!'

The First Day on the Somme

- Martin Middlebrook

2006-05-25

After an immense but useless bombardment, at 7.30 am. On

1 July 1916 the British Army went over the top and attacked the German trenches. It was the first day of the battle of the Somme, and on that day the British suffered nearly 60,000 casualties, two for every yard of their front. With more than fifty times the daily losses at El Alamein and fifteen times the British casualties on D-day, 1 July 1916 was the blackest day in the history of the British Army. But, more than that, as Lloyd George recognised, it was a watershed in the history of the First World War. The Army that attacked on that day was the volunteer Army that had answered Kitchener's call. It had gone into action confident of a decisive victory. But by sunset on the first day on the Somme, no one could any longer think of a war that might be won. Martin Middlebrook's research has covered not just official and regimental histories and tours of the battlefields, but interviews with hundreds of survivors, both British and German. As to the action itself, he conveys the overall strategic

view and the terrifying reality that it was for front-line soldiers.

Collaborative Therapy - Harlene Anderson 2012-10-12
Collaborative Therapy: Relationships and Conversations That Make a Difference provides in-depth accounts of the everyday practice of postmodern collaborative therapy, vibrantly illustrating how dialogic conversation can transform lives, relationships, and entire communities. Pioneers and leading professionals from diverse disciplines, contexts, and cultures describe in detail what they do in their therapy and training practices, including their work with psychosis, incarceration, aging, domestic violence, eating disorders, education, and groups. In addition to the therapeutic applications, the book demonstrates the usefulness of a postmodern collaborative approach to the domains of education, research, and organizations.
