QED at Large - Talia Ringer 2019-09-03

Development of formal proofs of correctness of programs can increase actual and perceived reliability and facilitate better understanding of program specifications and their underlying assumptions. Tools supporting such development have been available for over 40 years but have only recently seen wide practical use. Projects based on construction of machine-checked formal proofs are now reaching an unprecedented scale, comparable to large software projects, which leads to new challenges in proof development and maintenance. Despite its increasing importance, the field of proof engineering is seldom considered in its own right; related theories, techniques, and tools span many fields and venues. QED at Large covers the timeline and research literature concerning proof development for program verification, including theories, languages, and tools. It emphasizes challenges and breakthroughs at each stage in history and highlights challenges that are currently present due to the increasing scale of proof developments. This monograph is intended for use by researchers and students who are new to the field. It provides the reader with an insightful overview of the work that has led to modern-day techniques for

formally verifying software. In times of increasing automation, this underpins many software systems so future trends are also highlighted.

FM 2008: Formal Methods - Jorge Cuellar 2008-05-08

This volume contains the proceedings of Formal Methods 2008, the 15th International Symposium on Formal Methods, organized by Abo Akademi University, Turku, Finland, during May 26-30, 2008. The series of Formal Methods conferences is supported by FME (Formal Methods Europe), an independent association which aims to stimulate the use of, and the research on, formal methods for system development. The first event in this series was VDM Europe, held in 1987. The scope of the symposium has grown since then, encompassing all aspects of software and hardware that are amenable to formal analysis. As in previous years, this symposium brought together innovators and practitioners in precise mathematical methods for software development, academic and industrial users as well as researchers, tool developers and vendors. We received 106 submissions from 24 countries, a demonstration of the international nature of the event. Each submission was carefully refereed by at least three reviewers. The Programme Committee finally selected 23 papers for presentation at the symposium after what was sometimes really extensive discussion! We would like to extend our thanks once more to all the members of the Programme Committee and to all the reviewers for their excellent and efficient work. (The names of all involved appear over the page.) Apart from the regular papers, there were five invited talks at the symposium, given by Arvind, Shmuel Katz, Paolo Briani, Jay Misra, and Dawson Engler. Arvind and Katz also submitted papers to accompany their talks and these are included in the volume. The Formal Methods 2008 symposium also included various related events.

Investing in Cultural Diversity and Intercultural Dialogue - Unesco 2009-01-01

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is

also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

Testimonios: Stories of Latinx and Hispanic Mathematicians - Pamela E. Harris 2021-08-16

Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

Serious Games and Edutainment Applications - Minhua Ma 2017-03-03

With the continued application of gaming for training and education, which has seen exponential growth over the past two decades, this book offers an insightful introduction to the current developments and applications of game technologies within educational settings, with cutting-edge academic research and industry insights, providing a greater understanding into current and future developments and advances within this field. Following on from the success of the first volume in 2011, researchers from around the world presents up-to-date research on a broad range of new and emerging topics such as serious games and emotion, games for music education and games for medical training, to gamification, bespoke serious games, and adaptation of commercial off-the shelf games for education and narrative design, giving readers a thorough understanding of the advances and current issues facing developers and designers regarding games for training and education. This second volume of Serious Games and Edutainment Applications offers further insights for researchers, designers and educators who are interested in using serious games for training and educational purposes, and gives game developers with detailed information on current topics and developments within this growing area.

The Future of the Teaching and Learning of Algebra - Kaye Stacey 2006-04-11

Kaye Stacey, Helen Chick, and Margaret Kendal The University of Melbourne, Australia Abstract: This section reports on the organisation, procedures, and publications of the ICMI Study, The Future of the Teaching and Learning of Algebra. Key words: Study Conference, organisation, procedures, publications The International Commission on Mathematical Instruction (ICMI) has, since the 1980s, conducted a series of studies into topics of particular significance to the theory and practice of contemporary mathematics education. Each ICMI Study involves an international seminar, the "Study Conference", and culminates in a published volume intended to promote and assist discussion and action at the international, national, regional, and institutional levels. The ICMI Study running from 2000 to 2004 was on The Future of the

Teaching and Learning of Algebra, and its Study Conference was held at The University of Melbourne, Australia from December to 2001. It was the first study held in the Southern Hemisphere. There are several reasons why the future of the teaching and learning of algebra was a timely focus at the beginning of the twenty first century. The strong research base developed over recent decades enabled us to take stock of what has been achieved and also to look forward to what should be done and what might be achieved in the future. In addition, trends evident over recent years have intensified. Those particularly affecting school mathematics are the "massification" of education—continuing in some countries whilst beginning in others—and the advance of technology.

The Europa World of Learning - Joseph Bascom St. John 2005

Provides: over 26,000 academic institutions, 150,000 staff and officials; extensive coverage of universities, colleges and other centres of learning; and detailed information on over 400 international cultural, scientific and educational organizations.

Informality - Guillermo Perry 2007

Analyzes informality in Latin America, exploring root causes and reasons for and implications of its growth. This book uses two distinct but complementary lenses. It concludes that reducing informality levels and overcoming the "culture of informality" will require actions to increase aggregate productivity in the economy.

Using Z - Jim Woodcock 1996

This book contains enough material for three complete courses of study. It provides an introduction to the world of logic, sets and relations. It explains the use of the Z notation in the specification of realistic systems. It shows how Z specifications may be refined to produce executable code; this is demonstrated in a selection of case studies. The essentials of specification, refinement and proof are covered, revealing techniques never previously published. Exercises, Solutions and set of Transparencies are available via <http://www.comlab.ox.ac.uk/usingz.html>

Latin America - E. Br Burns 2016-01-20

For courses in the History of Latin America and Modern Latin America. A thoroughly updated examination of Latin American Latin America: An Interpretive History interweaves the story of Latin America with coverage of broader themes and regional differences. Building upon the work of original author E. Bradford Burns, current author Julie Charlip presents Latin American history as a continuum to help students make connections among time periods and events, and see the impact of the past upon the present. A new closing chapter examines in detail the Pink Tide the swing left in Latin America that began at the end of the twentieth century and has continued over the last 15 years. NOTE: This ISBN is for a Pearson Books a la Carte edition a convenient, three-hole-punched, loose-leaf text. In addition to the flexibility offered by this format, Books a la Carte editions offer students great value, as they cost significantly less than a bound textbook. "

Power and Politics in University Governance - Imanol Ordorika Sacristán 2003

Drawing from a case study of the "Universidad Nacional Autonoma de Mexico," this work analyses the connection between political processes and change in higher education. The author explains that while there are increasing demands these have not produced rapid responses from the university and tries to understand why this lack of response has generated internal and external tensions and conflictive dynamics.

Tecnologías disruptivas del proceso de globalización - Silvia Johana Cañas Duarte 2019-04-15

El fenómeno global y globalizante de las innovaciones disruptivas suele estudiarse desde una óptica meramente técnica. Pero las innovaciones disruptivas son también un fenómeno cultural que reclama una mirada desde la óptica de las humanidades. Aunque el fenómeno `disruptivo' no apareció de repente a finales del siglo pasado, se impone inicialmente un escrutinio detallado del pensamiento económico que encapsuló, a modo de credo, el fenómeno disruptivo como una realidad sui generis del más reciente proceso globalizador. Tal análisis aporta la singular paradoja de que el fenómeno disruptivo carecería de un

marco teórico válido que permita no solo explicar, sino anticipar su dinámica, al menos a corto o mediano plazo. Resolver esta aporía es un reto académico inmediato, al menos desde el lado de la economía, la sociología y, por qué no, de la filosofía. Por el momento, los productos y servicios derivados de las innovaciones disruptivas son y seguirán siendo elementos cada vez más imprescindibles para una mayoría creciente de habitantes del planeta. Los emprendimientos empresariales que las hacen y harán factibles continuarán imponiendo un rumbo frenético a la inversión e innovación misma. La fisonomía social y cultural de la humanidad en ciernes apenas empieza a ser intuida.
