Marketing Intelligent Systems Using Soft

Computing - Jorge Casillas

Dr. Jay Liebowitz Orkand

When I first heard the general topic of this book, Marketing Intelligent Systems or what I'll refer to as Marketing Intelligence, it sounded quite intriguing. Certainly, the marketing field is laden with numeric and symbolic data, ripe for various types of mining—data, text, multimedia, and web mining. It's an open laboratory for applying numerous forms of intelligentsia—neural networks, data mining, expert systems, intelligent agents, genetic algorithms, support vector machines, hidden Markov models, fuzzy logic, hybrid intelligent systems, and other techniques. I always felt that the marketing and finance domains are wonderful application areas for intelligent systems, and this book demonstrates the synergy between marketing and intelligent systems, especially soft computing. Interactive advertising is a complementary field to marketing where intelligent systems can play a

role. I had the pleasure of working on a summer faculty fellowship with R/GA in New York City—they have been ranked as the top interactive advertising agency worldwide. I quickly learned that interactive advertising also takes advantage of data visualization and intelligent systems technologies to help inform the Chief Marketing Officer of various companies. Having improved ways to present information for strategic decision making through use of these technologies is a great benefit.

Integrated Marketing Communications in Advertising and Promotion -

Terence A. Shimp 2010

The eighth edition of Shimp's market-leading INTEGRATED MARKETING

COMMUNICATIONS IN ADVERTISING AND

PROMOTION, International

Edition fully integrates all aspects of marketing communication. While continuing to focus on the time honored IMC methods, the text reflects new academic literature and practitioner developments in the field. Some reorganization along with comprehensive treatment on the fundamentals of advertising and promotion are the focus of the revision. Changes include earlier coverage of new brands (ch. 3), the latest in various forms of Internet advertising (ch. 13), a new chapter (18) on PR and word-of-mouth management, and expanded coverage environmental issues regarding global warming and sustainability in a newly-organized ethics chapter (21).

Advertising and Promotion - Dr. Chris Hackley 2005-01-26 "A readable and absorbing account of what advertising people try to achieve (whether or not they know quite how or why), grounded in Chris Hackley's real and recent acquaintance with the practicalities of advertising, as

well as its principles.... He minimises the inevitable jargon of linguistics and communication theory. His own language is always accurate and clear, and often engaging. The well managed flow from chapter to chapter sustains interest and enjoyment. I read the book from cover to cover in one sitting." - INTERNATIONAL JOURNAL OF ADVERTISING "Professor Hackley's book provides a timely reminder to student and practitioner alike that advertising continues to play a key role in the successful planning and implementation of marketing communications. Underpinned by a series of topical and often thought-provoking illustrations, this work not only explains how advertising is developed, but also presents the discipline in the wider context of socio-cultural and linguistic research. Working from a practical advertising management basis, the text raises some key issues for advertising as focus for academic and intellectual

study." - Chris Blackburn, The Business School, Oxford Brookes University, formerly Account Director at Foote, Cone & Belding, Leagas Delaney and Boase Massimi Pollitt "Dr Hackley has an uncommon approach to advertising. His book combines the abstract theory of advertising and its effects with a hard-nosed practical approach. It is a guide to understanding and appreciating advertising and a way to understand how and why advertising works or why it does not. I think that this book is a fine text for students. Even more, it deserves to be read by advertising practitioners." - Arthur J. Kover, former editor of the Journal of Advertising Research, Management Fellow at the Yale School of Management Advertising and Promotion is not only a detailed and insightful account of how advertising is created; the book also explains how advertising comes to cast its all-enveloping shadow over contemporary consumer culture. Many case

examples drawn from major international campaigns are used to illustrate the power of advertising to portray brand 'personalities' in terms that resonate with consumers across many cultures. It contains detailed coverage of the major areas of advertising and marketing communications but it is not a simplistic treatment. Advertising and Promotion takes a novel intellectual approach and draws on concepts from the wider humanities and social sciences to cast fresh light on an over-familiar subject matter. It uniquely combines detailed case information, current research and lively topical issues to offer an authoritative and comprehensive account of advertising's pre-eminent role in contemporary marketing communications. It is an advanced student text, a reflective practitioner's handbook and an insightful account for the general reader. **Integrated Marketing Communications** - Don E. Schultz 1993 "Integrated Marketing

Communications challenges business to confront a fundamental dilemma in today's marketing - the fact, that mass media advertising, by itself, no longer works. This landmark book reveals that strategies long used to deliver selling messages to a mass culture through a single medium are now obsolete - and shows marketers how to get back on track."--BOOK JACKET. "The answer lies in customer-focused marketing, a key planning tool that can - in today's diverse, fragmented marketplace - explain the lifestyles, attitudes, and motivations of distinct buyer groups and predict their likely buying behaviors in the future. Schultz, Tannenbaum, and Lauterborn explain how, by beginning with detailed consumer information, marketers can build a synchronized, multi-channel communications strategy that reaches every market segment with a single, unified message."--BOOK JACKET. "This book also shows how to put an integrated program into

practice, with expert guidance on planning, coordinating, and controlling the entire communications process. Along the way, the authors tackle those critical questions that too often impede marketing decisions, such as who should control the communications program? How should resources be allocated to advertising, sales promotion, direct response, public relations, and other marketing communications options? How can companies resolve "turf battles" and combat fears of budget loss? How should the different players - agencies and suppliers - be compensated? And most importantly, how can the impact of an integrated strategy be measured and made accountable?"--BOOK JACKET. "Extensive-examples and two in-depth success stories detail how top organizations are sharpening their competitive edge through integrated communications programs."--BOOK JACKET. "An incisive study of the barriers that confound today's marketing, Integrated

Marketing Communications breaks new ground for all business thinkers and strategists."--BOOK JACKET.
