The co-editors are experienced academic clinicians with active interests in clinical neurovascular imaging and cerebrovascular surgery, who have worked within vibrant hospital and academic settings at the forefront of the best clinical practices related to diseases involving the basilar artery. The co-editors clinical experience has been acquired in centers of excellence across the USA, Europe, and the Far East. In compiling this book, the co-editors have also called upon many of the worlds best basic and clinical neuroscientists, specializing in knowledge of clinical conditions affecting the basilar artery, for their expert input on the latest clinical management of patients with diseases involving this artery. **Assessing the Effects of Emerging Plastics on the Environment and Public Health** - Joo, Sung Hee 2022-06-03

Plastic pollution has been a growing concern globally, especially under the COVID-19 pandemic due to the use of personal protective equipment. While many engineers and environmental scientists have been addressing global plastic pollution, special attention must also be paid to smaller plastics such as micro- and nano-plastics. These smaller plastics pollute and affect the health of the public, environment, and marine life. Risk assessment of plastics is required to evaluate currently available treatment technologies and identify the significance of plastic pollution. Assessing the Effects of Emerging Plastics on the Environment and Public Health assesses the harmful effects of plastics on the environment and public health. It evaluates the potential risks of micro- and nano-plastics and reviews applications of modeling tools and prevention approaches using technologies to minimize plastic pollution through the development of biodegradable plastics or recycling and reusing plastics in environmentally friendly ways. Covering topics such as agroecosystems, preventive measures, and bioplastics, this book is an indispensable resource for environmentalists, environmental engineers, government officials, libraries, business leaders, students

and educators of higher education, academicians, and researchers.
