Communicating Mobility and Technology -

Ehren Helmut Pflugfelder 2016-07-07

Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies, Ehren Helmut Pflugfelder turns

specifically to automobility, a term used to describe the kinds of mobility afforded by autonomous, automobile-based movement technologies and their ramifications. Thus far, few studies in technical communication have explored the development of mobility technologies, the immense power that highly structured, environmentally significant systems have in the world, or the human-machine interactions that take place in such activities. Applying kinaesthetic rhetoric, a rhetoric that is sensitive to and developed from the mobile, material context of these technologies, Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day, open-source vehicle projects, and a large case study of an autonomous, electric pod car network that ultimately failed. Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us, often unconsciously, into regimes of movement and ways of experiencing the world. As Pflugfelder shows, mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks.

Biomechanics - Christopher D Armstrong 2018-11-02

The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

And Give Up Showbiz? - Josh Young 2014-09-16

In the early '90s, Big Tobacco was making a killing. There was no entity more powerful, and national tobacco-related deaths numbered in the hundreds of thousands each year. The economic loss from smoking-related illnesses was billions of dollars. And yet, Big Tobacco had never paid a nickel in court. Until one Southern, small-town lawyer figured out how Florida could sue Big Tobacco to reimburse the state for health care costs. The end result? Beyond the \$13 billion settlement, hundreds of thousands of American lives have been, and will continue to be, saved. Meet Fred Levin. Called by his own son "a philanthropist and a cockroach," Fred Levin is no ordinary attorney, and his remarkable story is far from squeaky clean. In And Give Up Showbiz?, New York Times bestselling author Josh Young works closely with Levin to give readers a glimpse into the extraordinary and entertaining life of the top trial lawyer who was a pioneer in establishing American personal injury law. Seen as an inspiring innovator by some and a flamboyant self-promoter by others, Levin has not only fought against Big Tobacco, he has won victories for women, African Americans, and workers everywhere. Levin's unprecedented legal career is just one aspect of his roller-coaster life story. From managing one of the world's greatest boxers to avoiding multiple disbarment attempts, and from becoming a chief in the country of Ghana to even being a person of interest in two separate murder investigations, his story reads like a

novel suitable for the silver screen. And Give Up Showbiz? is both shockingly candid and wildly funny.

Evidence-based Conservation - Terry C. H. Sunderland 2013

The basis of this book is the disparity between the science of conservation biology and the design and execution of biodiversity conservation projects in the field. The book argues for an 'evidence-based approach', drawing information from fifteen projects in the Lower Mekong regions, with the aim of allowing more effective integrated conservation projects.

Rollover Accident Reconstruction -

Christopher D Armstrong 2018-11-02

The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. Tales of an African Vet - Roy Aronson
2011-10-04

When do you watch a wild animal suffer and let nature take its course, and when do you

intervene? In his more than twenty-five years as an African vet, Roy Aronson has tended to a two-ton rhino that lost its horn after colliding with a concrete wall, facilitated the miraculous recovery of a squirrel monkey, performed eye surgery on a lion out in the bush, and treated a hedgehog that had been mauled by a dog. He has also worked with some of Africa's most dedicated conservationists and wildlife veterinarians. He has witnessed their passion and bravery and been with them when hard decisions had to be made. Tales of an African Vet brings together Dr. Aronson's adventures in a rare behind-the-scenes look at those who treat wild animals in their natural habitats. Whether you are drawn to outdoor adventure stories, African wildlife, or the veterinarian's trade, you will find this a riveting read, filled with rich insights into both the animal and human cultures of Africa.
