**Causality and time: from relativity to quantum physics** - Marino Dobrowolny 2017-02-09

This book provides a description of the evolution of the concepts of causality and time through modern physics considering first relativity theories and then quantum mechanics. Relativity, at least in the form given by Einstein, denies reality of past, present and future and does not indicate a time direction. On the other hand a time direction is indicated by all the phenomena we observe including our own existence. Quantum mechanics seems to indicate a different story. It is argued that, because of its non deterministic character, it is capable to indicate an objective time direction. This occurs through the phenomena of wave function collapse and entanglement which are discussed at length.

**The Jilting of Jane (Illustrated)** - H G Wells 2021-04-28

The Jilting of Jane is a short story by H. G. Wells. Herbert George "H. G." Wells (21 September 1866 - 13 August 1946) was an English writer, now best known for his work in the science fiction genre. He was also a prolific writer in many other genres, including contemporary novels, history, politics and social commentary, even writing textbooks and rules for war games. Wells is sometimes called "The Father of Science Fiction," as are Jules Verne and Hugo Gernsback. His most notable science fiction works include *The War of the Worlds*, *The Time Machine*, *The Invisible Man* and *The Island of Doctor Moreau*. Wells's earliest specialised training was in biology, and his thinking on ethical matters took place in a specifically and fundamentally Darwinian context. He was also from an early date an outspoken socialist, often (but not always, as at the beginning of the First World War) sympathising with pacifist views. His later works became increasingly political and didactic, and he sometimes indicated on official documents that his profession was that of "Journalist."

**There is Not Any Black Hole** - Carlo Maria Pace 2016

In questo libro (scritto interamente in inglese) l'autore, partendo dall'equazione di campo di Einstein della Teoria della Relatività Generale, corregge la soluzione di Schwarzschild, e mostra che, nella soluzione corretta di Schwarzschild, non c'è alcun orizzonte degli eventi e perciò non c'è alcun buco nero. Inoltre, l'autore estende tutto ciò alle sue dirette conseguenze, in particolare correggendo la soluzione di Kerr, la soluzione di Reissner-Nordstrøm e la soluzione di Kerr-Newman. Poi, l'autore estende queste quattro soluzioni corrette (di Schwarzschild, di Kerr, di Reissner-Nordstrøm e di Kerr-Newman) anche al caso in cui la costante cosmologica è più grande di zero. D'altra parte, l'autore, partendo dalla forma generale dell'equazione di campo di Einstein della Teoria della Relatività Generale, dimostra anche in generale l'inesistenza di qualsiasi orizzonte degli eventi, e perciò l'inesistenza di qualsiasi buco

nero, nel campo di applicazione della Teoria della Relatività Generale. Infine, l'autore esplora anche le conseguenze di tutto ciò sull'entropia dell'universo, sul processo di emissione di Hawking, sulla Teoria del Big Bang e sulle osservazioni astronomiche.

So it is that the service of these "heroines" is that which only women could have given to the world.

Vimanas and the wars of the gods - Enrico Baccarini 2016-08-03

An astonishing book that will lead to rewrite the history of mankind. An unexplored world, a journey beyond the boundaries of human history. From over five thousand years India and Pakistan seem to guard

jealously a forgotten past, a secret locked inside of the oldest traditions that human history knows. The journey starts from an highly evolved civilization but fall into oblivion, a culture that left to posterity a huge amount of texts transmitted orally and later merged into Hinduism. Traditions that speak of lost civilizations, wars fought between men and gods with highly advanced technologies and machines capable of flying in the air and in space called Vimana. Following the tracks and studies conducted in the '70s by David William Davenport, has set new light on the events that led to the destruction of the city of Mohenjo Daro (Pakistan) and the disappearance of the Harappan civilization tying their story to submerged ruins discovered in the Indian Ocean and dated back to 10,000 years ago.

The Training & Work of an Initiate - Dion Fortune 2000-11-01

The Training and Work of an Initiate shows how, from ancient Qabalistic, Greek, and Egyptian roots, the Western Esoteric Systems have an unbroken initiation tradition that has been handed down from adept to neophyte. In this book, Dion Fortune indicates the broad outlines and underlying principles of these systems, illuminating an obscure and greatly misunderstood aspect of the path. Thanks to her teaching, even if you cannot give your entire life over to the pursuit of esoteric science, you can still develop a philosophy of life and learn your individual relationship to the cosmic whole. You will discover how initiates prepare body, mind, and spirit for the challenging journey that is the esoteric path, what the path of initiation looks like, and what it is to be called to this work. The book is filled with accessible information, presented in a way so that "even that which the smallest cup can carry away is the true water of life". This revised edition contains a new foreword by Gareth Knight, and an index.

*The Secrets of Dr John Richard Taverner* - Dion Fortune 2014-04-22

Dr Taverner is an occult Sherlock Holmes, an esoteric Master who uses his powers to aid 'untreatable' patients for whom orthodox medical science can do nothing. Utilizing his knowledge of White Magic, he fights

an unrelenting battle against vampires, death-hounds, body-snatchers and members of the nefarious Black Lodge. Well-written and briskly paced, these twelve stories stand on their own merits - but there is more to these tales than meets the eye. Dion Fortune was herself a mage, a high initiate of the Hermetic Order of the Golden Dawn and founder of the Society of the Inner Light. The tales she tells are based on real events, and she uses 'The Secrets of Dr Taverner' as a vehicle to introduce the reader to magical practices and many arcane principles of occult law. Each story in this collection is a complete case, as gripping and as entertaining as the stories of Sherlock Holmes. They take you into the inner worlds of the human mind - a world full of strange twists and unexpected happenings!

*The Passionate Gardener* - Rudolf Borchardt 2006

Esoteric Orders and Their Work - Dion Fortune 2000-10-01

The knowledge guarded by these schools--passed down through the ages, and revised from time to time by great teachers--is a secret traditional science that studies the causes that lie behind observable phenomena. Dion Fortune reveals every aspect of these secret organizations and the training they offer to initiates.
