Translation Studies - Susan Bassnett 2002

In the late 1970s a new academic discipline was born: Translation Studies. We could not read literature in translation, it was argued, without asking ourselves if linguistic and cultural phenomena really were 'translatable' and exploring in some depth the concept of 'equivalence'. When Susan Bassnett's Translation Studies appeared in the New Accents series, it quickly became the essential introduction to this new subject. Susan Bassnett tackles the crucial problems of translation and offers a history of translation theory, beginning with the ancient Romans and encompassing key twentieth-century structuralist work. She then explores specific problems of literary translation through a close, practical analysis of texts, and completes her book with extensive suggestions for further reading. Twenty years after publication, the field of translation studies continues to grow. Updated for the second time, Susan Bassnett's Translation Studies remains essential reading for anyone new to the field.

Translation-Driven Corpora - Federico Zanettin 2014-04-08

Electronic texts and text analysis tools have opened up a wealth of

opportunities to higher education and language service providers, but learning to use these resources continues to pose challenges to scholars and professionals alike. Translation-Driven Corpora aims to introduce readers to corpus tools and methods which may be used in translation research and practice. Each chapter focuses on specific aspects of corpus creation and use. An introduction to corpora and overview of applications of corpus linguistics methodologies to translation studies is followed by a discussion of corpus design and acquisition. Different stages and tools involved in corpus compilation and use are outlined, from corpus encoding and annotation to indexing and data retrieval, and the various methods and techniques that allow end users to make sense of corpus data are described. The volume also offers detailed guidelines for the construction and analysis of multilingual corpora. Corpus creation and use are illustrated through practical examples and case studies, with each chapter outlining a set of tasks aimed at guiding researchers, students and translators to practice some of the methods and use some of the resources discussed. These tasks are meant as hands-on activities to be carried out using the materials and links available in an

accompanying DVD. Suggested further readings at the end of each chapter are complemented by an extensive bibliography at the end of the volume. Translation-Driven Corpora is designed for use by teachers and students in the classroom or by researchers and professionals for self-learning. It is an invaluable resource for anyone interested in this fast growing area of scholarly and professional activity.

Translation and Conflict - Mona Baker 2018-10-25

Translation and Conflict was the first book to demonstrate that translators and interpreters participate in circulating as well as resisting the narratives that create the intellectual and moral environment for violent conflict and social tensions. Drawing on narrative theory and with numerous examples from historical and current contexts of conflict, Mona Baker provides an original and coherent model of analysis that pays equal attention to the circulation of narratives in translation and to questions of dominance and resistance. With a new preface by Sue-Ann Harding, Translation and Conflict is more than ever the essential text for any student or researcher interested in the study of translation and social movements.

Research Methodologies in Translation Studies - Gabriela Saldanha 2014-04-08

As an interdisciplinary area of research, translation studies attracts

students and scholars with a wide range of backgrounds, who then need to face the challenge of accounting for a complex object of enquiry that does not adapt itself well to traditional methods in other fields of investigation. This book addresses the needs of such scholars – whether they are students doing research at postgraduate level or more experienced researchers who want to familiarize themselves with methods outside their current field of expertise. The book promotes a discerning and critical approach to scholarly investigation by providing the reader not only with the know-how but also with insights into how new questions can be fruitfully explored through the coherent integration of different methods of research. Understanding core principles of reliability, validity and ethics is essential for any researcher no matter what methodology they adopt, and a whole chapter is therefore devoted to these issues. Research Methodologies in Translation Studies is divided into four different chapters, according to whether the research focuses on the translation product, the process of translation, the participants involved or the context in which translation takes place. An introductory chapter discusses issues of reliability, credibility, validity and ethics. The impact of our research depends not only on its quality but also on successful dissemination, and the final chapter therefore deals with what is also generally the final stage of the research process: producing a research report.

The Translator's Turn - Douglas Robinson 1991

Despite landmark works in translation studies such as George Steiner's *After Babel* and Eugene Nida's *The Theory and Practice of Translation*, most of what passes as con-temporary "theory" on the subject has been content to remain largely within the realm of the anecdotal. Not so Douglas Robinson's ambitious book, which, despite its author's protests to the contrary, makes a bid to displace (the deconstructive term is apposite here) a gamut of earlier cogitations on the subject, reaching all the way back to Cicero, Augustine, and Jerome. Robinson himself sums up the aim of his project in this way: "I want to displace the entire rhetoric and ideology of mainstream translation theory, which ... is medieval and ecclesiastical in origin, authoritarian in intent, and denaturing and mystificatory in effect." -- from <http://www.jstor.org> (Sep. 12, 2014).

Audiovisual Translation - Luis Perez-Gonzalez 2014-08-27

In this clear, user- friendly book, Luis Pérez-González

introduces and explores the field, presenting and critiquing key concepts, research models and methodological approaches. Features include: • introductory overviews at the beginning of each chapter, outlining aims and relevant connections with other chapters • breakout boxes showcasing key concepts, research case studies or other relevant links to the wider field of translation studies • examples of audiovisual texts in a range of languages with back translation support when required • summaries reinforcing key issues dealt with in each chapter • follow- up questions for further study • core references and suggestions for further reading. • additional online resources on an extensive companion website This will be an essential text for all students studying audiovisual or screen translation at postgraduate or advanced undergraduate level and key reading for all researchers working in the area.

Mona Baker is one of the leading figures in the development of translation studies as an academic discipline. This book brings together fifteen of her most influential articles, carefully selected and grouped under three main topics that represent her most enduring contributions to the field: corpus-based translation studies, translation as renarration and translators in society. These applications and approaches have been widely adopted by translation scholars around the globe. The first section showcases Baker's pioneering work in introducing corpus linguistics methodologies to the field of translation studies, which established one of the fastest growing subfields in the discipline. The second section focuses on her application of narrative theory and the notion of framing to the study of translation and interpreting, and her contribution to demonstrating the various ways in which translators and interpreters intervene in the negotiation of social and political reality. The third and final section discusses the role of translators and interpreters as social and political activists who use their linguistic skills to empower voices made invisible by the global power of English and the politics of language. Tracing key moments in the development of translation studies as a discipline, and with a general introduction by Theo Hermans and section introductions by other scholars contextualising the work, this is essential reading for translation studies scholars, researchers and advanced students.
