**The Summer Guests** - Mary Alice Monroe 2020-03-31

This "authentic, generous, and heartfelt" (Mary Kay Andrews, New York Times bestselling author) novel from the New York Times bestselling author of the Beach House series is about the bonds and new beginnings that are born from disasters and how, even during the worst of circumstances—or perhaps because of them—we discover what is most important in life. Late August is a beautiful time on the Southern coast—the peach trees are ripe, the ocean is warm, and the sweet tea is icy. It's the perfect time to enjoy the rocking chairs on the porch. But beneath the calm surface bubbles a threat: it's also peak hurricane season. When a hurricane threatens the coasts of Florida and South Carolina, an eclectic group of evacuees flees for the farm of their friends Grace and Charles Phillips in North Carolina: the Phillips's daughter Moira and her rescue dogs, famed equestrian Javier Angel de la Cruz, makeup artist Hannah McLain, horse breeder Gerda Klug and her daughter Elise, and island resident Cara Rutledge. Strangers to all but the Phillips, they must ride out the storm together. During the course of one of the most challenging weeks of their lives, relationships are put to the test as the evacuees are forced to confront the unresolved issues they have with themselves and with each other. But as the storm passes, they realize that what really matters isn't what they brought with them to the mountains. Rather, it's what they'll take with them once they leave.

"Fans of Elin Hilderbrand and Wendy Wax will enjoy the picturesque setting and heartwarming intertwined character arcs" (Booklist) and "Monroe writes gorgeously, with authority and tenderness, about the natural world and its power to inspire, transport, and to heal" (Susan Wiggs, #1 New York Times bestselling author).

**Greta's Story** - Valentina Camerini 2019-11-26

The inspiring true story of Greta Thunberg, a young eco-activist whose persistence sparked a global movement. You are never too young to make a difference. Ever since she learned about climate change, Greta Thunberg couldn't understand why politicians weren't treating it as an emergency. In August 2018, temperatures in Sweden reached record highs, fires raged across the country, and fifteen-year-old Greta decided to stop waiting for political leaders to take action. Instead of going to school on Friday, she made a sign and went on strike in front of

Stockholm's parliament building. Greta's solo protest grew into the global Fridays for Future—or School Strike 4 Climate—movement, which millions have now joined. She has spoken at COP24 (the UN summit on climate change) and has been nominated for the Nobel Peace Prize. This timely, unofficial biography is her story, but also that of many others around the world willing to fight against the indifference of the powerful for a better future.

So she went on strike, skipping school every Friday to sit outside of the Swedish Parliament building with a sign that read "School Strike for Climate." At first, Greta was the only one. But gradually, more and more students joined her, until her lone protest had sparked a worldwide student movement for action on climate change. Now, a year later, Greta is speaking to audiences of world leaders at important meetings like the United Nations Climate Conference and the World Economic Forum. She is leading the conversation on climate change and sparking worldwide conversation on how to save our planet. Greta is showing everyone that even the smallest person can make a big difference, and this picture book informs and inspires young readers who are beginning to learn about the world around them.

**Alice Across America** - Sarah Glenn Marsh 2020-02-04

Writer Sarah Glenn Marsh and illustrator Gilbert Ford's Alice Across America is a nonfiction picture book account of maverick Alice Ramsey, the first woman to drive a car across America in 1909. When Alice Ramsey was little, she loved to ride horses. As she grew up, more people were driving cars. From the moment Alice slid behind the wheel, she was

crazy about cars. So when the Maxwell-Briscoe Company challenged her to drive one of their new cars across the country as a promotional ploy to prove that even a lady could do it, Alice daringly accepted. With several women by her side, these brazen drivers sustained many hardships over the course of a remarkable two-month journey and far surpassed all expectations. With a clever blend of women's history, technological history, and American roading geography, this is a celebration of unstoppable women making strides in twentieth-century America.

"Complex worldbuilding and fascinating characters propel the intricate plot to a deeply satisfying climax. Sword-and-sorcery fans won't be able to put down this gripping tale of female solidarity and triumph." — Publishers Weekly (starred review) The Empire of Vishir has lost its ruler, and the fight to save Seravesh from the Roven Empire is looking bleak. Moreover, Askia has been captured by power-hungry Emperor Radovan, who plans on making her his wife simply so he can take her magic as his own, killing her in the process. Aware of his ex-wives' fates, Askia must find a means of avoiding this doom, not only for the sake of Seravesh, but now for Vishir as well. She must put both nations first and remember Ozura's advice: you must play the game in order to survive. Askia was born a soldier, but now it's time to become a spy. But it's hard to play a game where the only person who knows the rules wants to kill her. And time is a factor. The jewel Radovan has put around her neck will pull her power from her in thirty days. Worse, Vishir might not even have that long, as the two heirs to the throne are on the verge of civil war. Without any hope for help from the south, without any access to her magic, alone in a hostile land, Askia is no closer to freeing her people than she was when she fled to Vishir. In the clutches of a madman, the only thing she's close to is death. Yet she'd trade her life for a chance to save Seravesh. The problem: she may not have that choice.

*Margaret and the Moon* - Dean Robbins 2017-05-16

She loved studying algebra and geometry and calculus and using math to solve problems in the outside world. Soon math led her to MIT and then to helping NASA put a man on the moon! She handwrote code that would allow the spacecraft's computer to solve any problems it might encounter. Apollo 8. Apollo 9. Apollo 10. Apollo 11. Without her code, none of those missions could have been completed. Dean Robbins and Lucy Knisley deliver a lovely portrayal of a pioneer in her field who never stopped reaching for the stars.

Alice isn't naive - she's always known blocs like Ypsilanti exist, left behind after a foodborne illness ravished the country decades earlier and left pockets of severe urban decay in its wake. Men like her father - a major player at Cerulean Holdings - renew the devastated blocs and bring stability back into the areas. But, Ypsilanti is even worse than the tales she's heard, and rumor has it the bloc is faced with the threat of extermination by Cerulean, not renewal. Trapped within Ypsilanti's borders and left for dead, Alice teams up with a pair of teen scavengers who tracked the wreck of her pod. Despite their rough exterior and vulgar speech, they're her only option for navigating the hostile and violent environment of Ypsilanti, finding her brother, and getting out of No-Man's-Land alive."

**Trans Historical** - Greta LaFleur 2021-11-15

*Trans Historical* explores the plurality of gender experiences that flourished before the modern era, from Late Antiquity to the eighteenth century, across a broad geographic range, from Spain to Poland and

Byzantium to Boston. Refuting arguments that transgender people, experiences, and identities were non-existent or even impossible prior to the twentieth century, this volume focuses on archives—literary texts, trial transcripts, documents, and artifacts—that denaturalize gender as a category. The volume historicizes the many different social lives of sexual differentiation, exploring what gender might have been before modern medicine, the anatomical sciences, and the sedimentation of gender difference into its putatively binary form. The volume's multidisciplinary group of contributors consider how individuals, communities, and states understood and enacted gender as a social experience distinct from the assignment of sex at birth. Alongside historical questions about the meaning of sexual differentiation, *Trans Historical* also offers a series of diverse meditations on how scholars of the medieval and early modern periods might approach gender nonconformity before the nineteenth-century emergence of the norm and the normal. Contributors: Abdulhamit Arvas, University of Pennsylvania; Roland Betancourt, University of California, Irvine; M. W. Bychowski, Case Western Reserve University; Emma Campbell, Warwick University; Igor H. de Souza, Yale University; Leah DeVun, Rutgers University; Micah James Goodrich, University of Connecticut; Alexa Alice Joubin, George Washington University; Anna Klosowska; Greta LaFleur; Scott Larson, University of Michigan, Ann Arbor; Kathleen Perry Long, Cornell University; Robert Mills, University College London; Masha Raskolnikov; Zrinka Stahuljak, UCLA.

*Connectedness* - Marianne Goral Krogh Johansen 2020

Today we live in what geologists have named the Anthropocene. The Earth has entered a new geological epoch, and the climate crisis is a reality. The crisis is so substantial and complex that our existing knowledge of environmental disasters is insufficient. Without the realization that we, as human beings, are intimately connected to all other kinds of life, we are guilty of a collective sin of omission by ignoring the fundamental connectedness of humanity and nature. We are not just part of the same cycle, we are nature. And since everything affects and is affected by everything else, it seems sufficient to consider the Anthropocene from many perspectives and fields. 'Connectedness' includes a diverse selection of contributions, including Björk, Greta Thunberg, Donna Haraway and Tomas Saraceno, that brings many perspectives and disciplines into the discussion to the crucial period in which we are currently living.

**The Nature of Home** - Greta Gaard 2018-02-15

"As long as humans have been around, we've had to move in order to survive." So arises that most universal and elemental human longing for home, and so begins Greta Gaard's exploration of just precisely what it means to be at home in the world. Gaard journeys through the deserts of southern California, through the High Sierras, the Wind River Mountains, and the Northern Cascades, through the wildlands and waterways of Washington and Minnesota, through snow season, rain season, mud season, and lilac season, yet her essays transcend mere description of natural beauty to investigate the interplay between place and identity. Gaard examines the earliest environments of childhood and the relocations of adulthood, expanding the feminist insight that identity is formed through relationships to include relationships to place. "Home" becomes not a static noun, but an active verb: the process of cultivating the connections with place and people that shape who we become. Striving to create a sense of home, Gaard involves herself socially, culturally, and ecologically within her communities, discovering that as she works to change her environment, her environment changes her. As Gaard investigates environmental concerns such as water quality, oil

spills, or logging, she touches on their parallels to community issues such as racism, classism, and sexism, uncovering the dynamic interaction by which “humans, like other life on earth, both shape and are shaped by our environments.” While maintaining an understanding of the complex systems and structures that govern communities and environments, Gaard’s writing delves deeper to reveal the experiences and realities we displace through euphemisms or stereotypes, presenting issues such as homelessness or hunger with compelling honesty and sensitivity. Gaard’s essays form a quest narrative, expressing the process of letting go that is an inherent part of an impermanent life. And when a person is broken, in the aftermath of that letting go, it is a place that holds the pieces together. As long as we are forced to move—by economics, by war, by colonialism—the strategies we possess to make and redefine home are imperative to our survival, and vital in the shaping of our very identities.
