*China* - William A. Callahan 2012-02-16  
China is fast becoming the next superpower - a rise that presents a challenge to the world economically, politically and culturally. Drawing on extensive new Chinese sources, Professor

Callahan sheds fascinating light on how Chinese people understand their changing place, and what that might mean for the world.  
*The World of Gerard Mercator* - Andrew Taylor 2009-05-26

The story of discovery and mapmaking is one of pushing back shadows," writes Andrew Taylor, and "none in the last two thousand years achieved as much as Gerard Mercator in extending the boundaries of what could be comprehended." His life encompassed most of the turbulent, extraordinary sixteenth century, a time when revolutions would engulf religion, science, and civilization. Almost extinguished by the Inquisition, Mercator's genius lay in making maps, and his achievement did nothing less than revolutionize the study of geography.

Appropriately for an era undergoing radical change, Mercator was full of contradiction, tied to knowledge and beliefs of the past while forging a new path. He never traveled beyond northern Europe, yet he had the imagination to draw the entire world anew and to solve a problem that had baffled sailors and scientists for centuries: how a curved Earth could be faithfully rendered on a flat surface so as to allow for accurate navigation. His "projection"

was so visionary that it is used by NASA to map Mars today. Andrew Taylor has beautifully captured Mercator amidst the turmoil and opportunity of his times and the luminaries who inspired his talent-his teacher and business partner, Gemma Frisius; the English magus, John Dee; his benefactor, the Holy Roman Emperor Charles V, his cartographic collaborator, Abraham Ortelius. *The World of Gerard Mercator* is a masterful biography of one of the men most responsible for the modern world.

**The Geography of Bliss** - Eric Weiner  
2008-01-03

Part travel memoir, part humor, and part twisted self-help guide, *The Geography of Bliss* takes the reader across the globe to investigate not what happiness is, but WHERE it is. Are people in Switzerland happier because it is the most democratic country in the world? Do citizens of Qatar, awash in petrodollars, find joy in all that cash? Is the King of Bhutan a visionary for his initiative to calculate Gross National Happiness? Why is Asheville, North Carolina so damn happy? In a unique mix of travel, psychology, science and humor, Eric Weiner answers those questions and many others, offering travelers of all moods some interesting new ideas for sunnier destinations and dispositions.

Map Librarianship - Susan Elizabeth Ward Aber 2016-11-04

Map Librarianship identifies basic geoliteracy concepts and enhances reference and instruction skills by providing details on finding,

downloading, delivering, and assessing maps, remotely sensed imagery, and other geospatial resources and services, primarily from trusted government sources. By offering descriptions of traditional maps, geographic information systems (GIS), remote sensing, and other geospatial technologies, the book provides a timely and practical guide for the map and geospatial librarian to blend confidence in traditional library skill sets. Includes rarely discussed concepts of citing and referencing maps and geospatial data, fair use and copyright. Creates an awareness and appreciation of existing print map collections, while building digital stewardship with surrogate map and aerial imagery collections. Provides an introduction to the theory and applications of GIS, remote sensing, participatory neogeography and neocartography practices, and other geospatial technologies. Includes a list of geospatial resources with descriptions and illustrations of commonly used map types and

formats, online geospatial data sources, and an introduction to the most commonly used geospatial software packages available, on both desktop and mobile platforms

Visions of Glory - Kathleen Diffley 2019-11-01  
Visions of Glory brings together twenty-two images and twenty-two brisk essays, each essay connecting an image to the events that unfolded during a particular year of the Civil War. The book focuses on a diverse set of images that include a depiction of former slaves whipping their erstwhile overseer distributed by an African American publisher, a census graph published in the New York Times, and a cutout of a child's hand sent by a southern mother to her husband at the front. The essays in this collection reveal how wartime women and men created both written accounts and a visual register to make sense of this pivotal period. The collection proceeds chronologically, providing a nuanced history by highlighting the multiple meanings an assorted group of writers and

readers discerned from the same set of circumstances. In so doing, this volume assembles contingent and fractured visions of the Civil War, but its differing perspectives also reveal a set of overlapping concerns. A number of essays focus in particular on African American engagements with visual culture. The collection also emphasizes the role that women played in making, disseminating, or interpreting wartime images. While every essay explores the relationship between image and word, several contributions focus on the ways in which Civil War images complicate an understanding of canonical writers such as Emerson, Melville, and Whitman.

**The Atlas of African Affairs** - Ieuan L.L.  
Griffiths 2013-06-17

The Atlas of African Affairs is divided into five  
sections dealing with environmental, historical,  
political and economic issues and with Southern  
Africa. Throughout, the book presents an  
interdisciplinary, integrated perspective on  
African affairs. Most of the chapters deal with  
continent-wide themes and are illustrated by

maps of Africa as a whole drawn to a standardised outline of the same map projection and scale. Other chapters, often by way of example, discuss parts of the continent or individual countries and are illustrated with appropriate maps. The basic format of integrated text and maps is supplemented by guides to further reading at the end of each section as well as a series of detailed statistical tables at the end of the book.

The Geography of You and Me - Jennifer E. Smith 2014-04-15

Lucy lives on the twenty-fourth floor. Owen lives in the basement. It's fitting, then, that they meet in the middle -- stuck between two floors of a New York City apartment building, on an elevator rendered useless by a citywide blackout. After they're rescued, Lucy and Owen spend the night wandering the darkened streets and marveling at the rare appearance of stars above Manhattan. But once the power is back, so is reality. Lucy soon moves abroad with her

parents, while Owen heads out west with his father. The brief time they spend together leaves a mark. And as their lives take them to Edinburgh and to San Francisco, to Prague and to Portland, Lucy and Owen stay in touch through postcards, occasional e-mails, and phone calls. But can they -- despite the odds -- find a way to reunite? Smartly observed and wonderfully romantic, Jennifer E. Smith's new novel shows that the center of the world isn't necessarily a place. Sometimes, it can be a person.

**Serving Library Users from Asia** - John Hickok 2019-06-12

Asian populations are among some of the fastest growing cultural groups in the US. This book is a comprehensive guide to serving library users from 24 specific Asian countries. It begins with a broad overview of how libraries can better serve Asian communities and then devotes a chapter to each country, providing wealth of valuable resources.

**Maps of the Imagination** - Peter Turchi

2011-06-01

In *Maps of the Imagination*, Peter Turchi posits the idea that maps help people understand where they are in the world in the same way that literature, whether realistic or experimental, attempts to explain human realities. The author explores how writers and cartographers use many of the same devices for plotting and executing their work, making crucial decisions about what to include and what to leave out, in order to get from here to there, without excess baggage or a confusing surplus of information. Turchi traces the history of maps, from their initial decorative and religious purposes to their later instructional applications. He describes how maps rely on projections in order to portray a three-dimensional world on the two-dimensional flat surface of paper, which he then relates to what writers do in projecting a literary work from the imagination onto the page.

*Prisoners of Geography* - Tim Marshall

2016-10-11

First published in Great Britain in 2015 by Elliott and Thompson Limited.

**Time and the Other** - Johannes Fabian

2014-04-15

*Time and the Other* is a classic work that critically reexamined the relationship between anthropologists and their subjects and reoriented the approach literary critics, philosophers, and historians took to the study of humankind. Johannes Fabian challenges the assumption that anthropologists live in the "here and now," that their subjects live in the "there and then," and that the "other" exists in a time not contemporary with our own. He also pinpoints the emergence, transformation, and differentiation of a variety of uses of time in the history of anthropology that set specific parameters between power and inequality. In this edition, a new postscript by the author revisits popular conceptions of the "other" and the attempt to produce and represent knowledge

of other(s).

Traveling Man - James Rumford 2001-09-24  
Ibn Battuta was the traveler of his age—the fourteenth century, a time before Columbus when many believed the world to be flat. Like Marco Polo, Ibn Battuta left behind an account of his own incredible journey from Morocco to China, from the steppes of Russia to the shores of Tanzania, some seventy-five thousand miles in all. James Rumford has retold Ibn Battuta's story in words and pictures, adding the element of ancient Arab maps—maps as colorful and as evocative as a Persian miniature, as intricate and mysterious as a tiled Moroccan wall. Into this arabesque of pictures and maps, James Rumford has woven the story not just of a traveler in a world long gone but of a man on his journey through life.

(WCS)Human Geography - Harm J. De Blij  
2007-06-01

*The Blade Itself* - Joe Abercrombie 2015-09-08

The first novel in the First Law Trilogy and debut fantasy novel from New York Times bestseller, Joe Abercrombie. Logen Ninefingers, infamous barbarian, has finally run out of luck. Caught in one feud too many, he's on the verge of becoming a dead barbarian -- leaving nothing behind him but bad songs, dead friends, and a lot of happy enemies. Nobleman, dashing officer, and paragon of selfishness, Captain Jezal dan Luthar has nothing more dangerous in mind than fleecing his friends at cards and dreaming of glory in the fencing circle. But war is brewing, and on the battlefields of the frozen North they fight by altogether bloodier rules. Inquisitor Glokta, cripple turned torturer, would like nothing better than to see Jezal come home in a box. But then Glokta hates everyone: cutting treason out of the Union one confession at a time leaves little room for friendship. His latest trail of corpses may lead him right to the rotten heart of government, if he can stay alive long enough to follow it. Enter the wizard, Bayaz. A bald old

man with a terrible temper and a pathetic assistant, he could be the First of the Magi, he could be a spectacular fraud, but whatever he is, he's about to make the lives of Logen, Jezal, and Glokta a whole lot more difficult. Murderous conspiracies rise to the surface, old scores are ready to be settled, and the line between hero and villain is sharp enough to draw blood. Unpredictable, compelling, wickedly funny, and packed with unforgettable characters, *The Blade Itself* is noir fantasy with a real cutting edge.

[The Map Reader](#) - Martin Dodge 2011-05-09  
WINNER OF THE CANTEMIR PRIZE 2012  
awarded by the Berendel Foundation *The Map Reader* brings together, for the first time, classic and hard-to-find articles on mapping. This book provides a wide-ranging and coherent edited compendium of key scholarly writing about the changing nature of cartography over the last half century. The editorial selection of fifty-four theoretical and thought provoking texts demonstrates how cartography works as a

powerful representational form and explores how different mapping practices have been conceptualised in particular scholarly contexts. Themes covered include paradigms, politics, people, aesthetics and technology. Original interpretative essays set the literature into intellectual context within these themes. Excerpts are drawn from leading scholars and researchers in a range of cognate fields including: Cartography, Geography, Anthropology, Architecture, Engineering, Computer Science and Graphic Design. *The Map Reader* provides a new unique single source reference to the essential literature in the cartographic field: more than fifty specially edited excerpts from key, classic articles and monographs critical introductions by experienced experts in the field focused coverage of key mapping practices, techniques and ideas a valuable resource suited to a broad spectrum of researchers and students working in cartography and GIScience, geography, the

social sciences, media studies, and visual arts

*How I Learned Geography* - Uri Shulevitz  
2008-04

As he spends hours studying his father's world  
map, a young boy escapes the hunger and  
misery of refugee life. Based on the author's  
childhood in Kazakhstan, where he lived as a  
Polish refugee during World War II.

*The Revenge of Geography* - Robert D. Kaplan  
2013-09-10

NEW YORK TIMES BESTSELLER • In this  
"ambitious and challenging" (The New York  
Review of Books) work, the bestselling author of  
Monsoon and Balkan Ghosts offers a revelatory  
prism through which to view global upheavals  
and to understand what lies ahead for continents  
and countries around the world. In *The Revenge  
of Geography*, Robert D. Kaplan builds on the

insights, discoveries, and theories of great  
geographers and geopolitical thinkers of the  
near and distant past to look back at critical  
pivots in history and then to look forward at the  
evolving global scene. Kaplan traces the history  
of the world's hot spots by examining their  
climates, topographies, and proximities to other  
embattled lands. The Russian steppe's pitiless  
climate and limited vegetation bred hard and  
cruel men bent on destruction, for example,  
while Nazi geopoliticians distorted geopolitics  
entirely, calculating that space on the globe  
used by the British Empire and the Soviet Union  
could be swallowed by a greater German  
homeland. Kaplan then applies the lessons  
learned to the present crises in Europe, Russia,  
China, the Indian subcontinent, Turkey, Iran,  
and the Arab Middle East. The result is a holistic  
interpretation of the next cycle of conflict  
throughout Eurasia. Remarkably, the future can  
be understood in the context of temperature,  
land allotment, and other physical certainties:

China, able to feed only 23 percent of its people from land that is only 7 percent arable, has sought energy, minerals, and metals from such brutal regimes as Burma, Iran, and Zimbabwe, putting it in moral conflict with the United States. Afghanistan's porous borders will keep it the principal invasion route into India, and a vital rear base for Pakistan, India's main enemy. Iran will exploit the advantage of being the only country that straddles both energy-producing areas of the Persian Gulf and the Caspian Sea. Finally, Kaplan posits that the United States might rue engaging in far-flung conflicts with Iraq and Afghanistan rather than tending to its direct neighbor Mexico, which is on the verge of becoming a semifailed state due to drug cartel carnage. A brilliant rebuttal to thinkers who suggest that globalism will trump geography, this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms.

Sea Monsters on Medieval and Renaissance

Maps - Chet A. Van Duzer 2013

From dragons and serpents to many-armed beasts that preyed on ships and sailors alike, sea monsters have terrified mariners across all ages and cultures and have become the subject of many tall tales from the sea. Accounts of these creatures have also inspired cartographers and mapmakers, many of whom began decorating their maps with them to indicate unexplored areas or areas about which little was known. Whether swimming vigorously, gamboling amid the waves, attacking ships, or simply displaying themselves for our appreciation, the sea monsters that appear on medieval and Renaissance maps are fascinating and visually engaging. Yet despite their appeal, these monsters have never received the scholarly attention that they deserve. In *Sea Monsters on Medieval and Renaissance Maps*, Chet Van Duzer analyzes the most important examples of sea monsters on medieval and Renaissance maps produced in Europe. Van Duzer begins with the

earliest mappaemundi on which these monsters appear in the tenth century and continues to the end of the sixteenth century and, along the way, sheds important light on the sources, influences, and methods of the cartographers who drew or painted them. A beautifully designed visual reference work, *Sea Monsters on Medieval and Renaissance Maps* will be important not only in the history of cartography, art, and zoological illustration, but also in the history of the geography of the "marvelous" and of Western conceptions of the ocean.

**The Silk Roads** - Peter Frankopan 2016-02-16  
Far more than a history of the Silk Roads, this book is truly a revelatory new history of the world, promising to destabilize notions of where we come from and where we are headed next. From the Middle East and its political instability to China and its economic rise, the vast region stretching eastward from the Balkans across the steppe and South Asia has been thrust into the global spotlight in recent years. Frankopan

teaches us that to understand what is at stake for the cities and nations built on these intricate trade routes, we must first understand their astounding pasts. Frankopan realigns our understanding of the world, pointing us eastward. It was on the Silk Roads that East and West first encountered each other through trade and conquest, leading to the spread of ideas, cultures and religions. From the rise and fall of empires to the spread of Buddhism and the advent of Christianity and Islam, right up to the great wars of the twentieth century—this book shows how the fate of the West has always been inextricably linked to the East. Also available: *The New Silk Roads*, a timely exploration of the dramatic and profound changes our world is undergoing right now—as seen from the perspective of the rising powers of the East.

**Body Geographic** - Barrie Jean Borich  
2013-03-01

A memoir from the award-winning author of *My Lesbian Husband*, Barrie Jean Borich's *Body*

Geographic turns personal history into an inspired reflection on the points where place and person intersect, where running away meets running toward, and where dislocation means finding oneself. One coordinate of Borich's story is Chicago, the prototypical Great Lakes port city built by immigrants like her great-grandfather Big Petar, and the other is her own port of immigration, Minneapolis, the combined skylines of these two cities tattooed on Borich's own back. Between Chicago and Minneapolis Borich maps her own Midwest, a true heartland in which she measures the distance between the dreams and realities of her own life, her family's, and her fellow travelers' in the endless American migration. Covering rough terrain—from the hardships of her immigrant ancestors to the travails of her often-drunk young self, longing to be madly awake in the world, from the changing demographics of midwestern cities to the personal transformations of coming out and living as a lesbian—Body Geographic is

cartography of high literary order, plotting routes, real and imagined, and putting an alternate landscape on the map.

*The Incredible History of India's Geography* - Sanjeev Sanyal 2017-11-28

Could you be related to a blonde Lithuanian? Did you know that India is the only country that has both lions and tigers? Who found out how tall Mt Everest is? If you've ever wanted to know the answers to questions like these, this is the book for you. In here you will find various things you never expected, such as the fact that we still greet each other like the Harappans did and that people used to think India was full of one-eyed giants. And, sneakily, you'll also know more about India's history and geography by the end of it. Full of quirky pictures and crazy trivia, this book takes you on a fantastic journey through the incredible history of India's geography.

**Letters of a Peruvian Woman** - Françoise de Graffigny 2009-01-08

'It has taken me a long time, my dearest Aza, to

fathom the cause of that contempt in which women are held in this country ...' Zilia, an Inca Virgin of the Sun, is captured by the Spanish conquistadores and brutally separated from her lover, Aza. She is rescued and taken to France by Déterville, a nobleman, who is soon captivated by her. One of the most popular novels of the eighteenth century, the Letters of a Peruvian Woman recounts Zilia's feelings on her separation from both her lover and her culture, and her experience of a new and alien society. Françoise de Graffigny's bold and innovative novel clearly appealed to the contemporary taste for the exotic and the timeless appetite for love stories. But by fusing sentimental fiction and social commentary, she also created a new kind of heroine, defined by her intellect as much as her feelings. The novel's controversial ending calls into question traditional assumptions about the role of women both in fiction and society, and about what constitutes 'civilization'. ABOUT THE SERIES: For over 100 years Oxford World's

Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

The Power of Place - Harm J. De Blij 2010

Harm de Blij contends in this book that geography continues to hold us all in an unrelenting grip and that we are all born into natural and cultural environments that shape what we become, individually and collectively. *National Geographic Kids Encyclopedia of the American Indian* - Cynthia O'Brien 2019 American Indian customs, stories, and history come to life in this important and authoritative reference, artfully designed and packaged for kids and students. More than 160 tribes are featured in this outstanding new encyclopedia,

which presents a comprehensive overview of the history of North America's Native peoples. From the Apache to the Zuni, readers will learn about each tribe's history, traditions, and culture, including the impact of European expansion across the land and how tribes live today. Features include maps of ancestral lands; timelines of important dates and events; fact boxes for each tribe; bios of influential American Indians such as Sitting Bull; sidebars on daily life, homes, food, clothing, jewelry, and games; Did You Know facts with photographs; and traditional Native stories. The design is compelling and colorful, packed with full-color photographs. To help give kids the lay of the land, this reference is arranged by region, and all federally recognized tribes are included. Tribal members representing each region and experts at the National Museum of the American Indian at the Smithsonian Institution were involved in its creation. With nothing comparable available, it is sure to be a valuable

resource for kids, students, librarians, and families.

*Water Land* - Christy Hale 2018-05-22

A lake turns into an island. A cozy bay into a secluded cape. A gulf with sea turtles transforms into a peninsula surrounded by pirate ships. This unique information book for the very young switches between bodies of water and corresponding land masses with the simple turn of a page. Readers will delight as the story of *Water Land* unfolds and will see just how connected the earth and the water really are. This book has Common Core connections.

*A History of the World in 12 Maps* - Jerry Brotton 2014-10-28

A New York Times Bestseller “Maps allow the armchair traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns and the propagandist to boost his cause... rich and beautiful.” - Wall Street Journal Throughout history, maps have been

fundamental in shaping our view of the world, and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world, they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps - from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world. Brotton shows how each of his maps both influenced and reflected contemporary events and how, by considering it in all its nuances and omissions, we can better understand the world that produced it. Although the way we map our surroundings is more precise than ever before, Brotton argues that maps today are no more

definitive or objective than they have ever been. Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again. "A fascinating and panoramic new history of the cartographer's art." - The Guardian "The intellectual background to these images is conveyed with beguiling erudition.... There is nothing more subversive than a map." - The Spectator "A mesmerizing and beautifully illustrated book." -The Telegraph

Literature and Geography - Emmanuelle Peraldo  
2016-01-14

In a period marked by the Spatial Turn, time is not the main category of analysis any longer. Space is. It is now considered as a central metaphor and topos in literature, and literary criticism has seized space as a new tool. Similarly, literature turns out to be an ideal field for geography. This book examines the cross-fertilization of geography and literature as disciplines, languages and methodologies. In the

past two decades, several methods of analysis focusing on the relationship and interconnectedness between literature and geography have flourished. Literary cartography, literary geography and geocriticism (Westphal, 2007, and Tally, 2011) have their specificities, but they all agree upon the omnipresence of space, place and mapping at the core of analysis. Other approaches like ecocriticism (Buell, 2001, and Garrard, 2004), geopoetics (White, 1994), geography of literature (Moretti, 2000), studies of the inserted map (Ljunberg, 2012, and Pristnall and Cooper, 2011) and narrative cartography have likewise drawn attention to space. Literature and Geography: The Writing of Space Throughout History, following an international conference in Lyon bringing together literary academics, geographers, cartographers and architects in order to discuss literature and geography as two practices of space, shows that literature, along with geography, is perfectly valid to account for

space. Suggestions are offered here from all disciplines on how to take into account representations and discourses since texts, including literary ones, have become increasingly present in the analysis of geographers.

Blood Meridian - Cormac McCarthy 2010-08-11  
25th ANNIVERSARY EDITION • An epic novel of the violence and depravity that attended America's westward expansion, *Blood Meridian* brilliantly subverts the conventions of the Western novel and the mythology of the Wild West—from the bestselling, Pulitzer Prize-winning author of *The Road* Based on historical events that took place on the Texas-Mexico border in the 1850s, it traces the fortunes of the Kid, a fourteen-year-old Tennessean who stumbles into the nightmarish world where Indians are being murdered and the market for their scalps is thriving. Look for Cormac McCarthy's new novel, *The Passenger*.  
*Atlas of Knowledge* - Katy Borner 2015-03-20

The power of mapping: principles for visualizing knowledge, illustrated by many stunning large-scale, full-color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge; they reveal bursts of activity, pathways of ideas, and borders that beg to be crossed. This book, from the author of Atlas of Science, describes the power of topical maps, providing readers with principles for visualizing knowledge and offering as examples forty large-scale and more than 100 small-scale full-color maps. Today, data literacy is becoming as important as language literacy. Well-designed visualizations can rescue us from a sea of data, helping us to make sense of information, connect ideas, and make better decisions in real time. In Atlas of Knowledge, leading visualization expert Katy Börner makes the case for a systems science approach to science and technology studies and explains different types and levels of

analysis. Drawing on fifteen years of teaching and tool development, she introduces a theoretical framework meant to guide readers through user and task analysis; data preparation, analysis, and visualization; visualization deployment; and the interpretation of science maps. To exemplify the framework, the Atlas features striking and enlightening new maps from the popular “Places & Spaces: Mapping Science” exhibit that range from “Key Events in the Development of the Video Tape Recorder” to “Mobile Landscapes: Location Data from Cell Phones for Urban Analysis” to “Literary Empires: Mapping Temporal and Spatial Settings of Victorian Poetry” to “Seeing Standards: A Visualization of the Metadata Universe.” She also discusses the possible effect of science maps on the practice of science.

**Challenges and Opportunities in Global Approaches to Education** - Neimann, Theresa D. 2019-09-27

In order to develop student competencies in

K-12 and Higher Education environments, evidence-based tools and concepts are essential in ensuring the development of student skills and proficiencies. Evidence-based pedagogical practices leading to student learning preferences culturally and internationally are essential to educational success. *Challenges and Opportunities in Global Approaches to Education* is an essential research publication that provides evidence-based tools and concepts to develop student competencies in the K-20 environment. Chapters in the monograph cover topics in a

theoretical context such as how technology, online learning, and culture inform evidence-based development of student competencies. This book is essential for curriculum teachers, designers, instructional designers, administrators, professionals, researchers, academicians, and students concerned with the management of expertise, knowledge, information, and organizational development in different types of educational communities and environments.
