The Tax Schedule - Eile Gibson 2016-09-30

The Tax Schedule explains the underlying rationale of the key provisions of the tax schedule, and provides updated model long-form and short-form warranties and tax indemnities. These are also included on a disk, so that practitioners can download and adapt the model documents for their own transactions. Since January 2014 we have witnessed continued erosion of the powers of the tax evasion industry including a new Targeted Anti-Avoidance Rule (TAAR), increased penalties and new HMRC powers, major changes the taxation of UK property for non-UK residents and non-UK domiciles, and a recently introduced investors' relief, similar to entrepreneurs' relief but which is available to non-employees and directors. The book has been updated to reflect these developments. This edition contains an extended glossary, details of new investor relief schemes and changes in legislation as announced as at 15 September 2016. The intended readership of the book is tax lawyers, tax accountants, corporate lawyers, corporate advisors and finance directors who are involved in the process of the sale of a company.

Going for Growth - Emma Jones 2015-04-30

You've joined record numbers of people in starting a business and now you're looking to grow. But you don't want the kind of growth that comes with borrowing money, employing people, or moving to pricey offices. This book has been written for you. It looks at how to grow the business without (metaphorically speaking) outgrowing the home. It offers five ways to increase sales and profit without overly increasing overheads and cost. The pages are filled with stories of businesses growing in this modern way, and a map to follow their lead. They are franchising, outsourcing and going global at speed, whilst spreading wealth across the UK. If you want to grow your business, enjoy this how-to guide, written by an entrepreneur who has spent a decade developing her own business, whilst supporting thousands of others in doing the same.

Risk in the Film Business - Michael Franklin 2022-07-25

This book explores the complex, multifaceted and contested subject of risk in the film business. How risk is understood and managed has a substantial impact upon which films are financed, produced and seen. Founded on substantial original research accessing the highest level of industry practitioners, this book examines the intertwined activity of independents, large media companies including major studios, the international marketplace, and related audio-visual sectors such as high-end television. The book shows how risk is generally framed, or even intuited, rather than calculated, and that this process occurs across a sliding scale of formality. This work goes beyond broad creative industries characterisations of a "risky sector" and concentrations on Box Office return modelling, to provide a missing middle. This means a coherent analytic coverage of business organisation and project construction to address the complex practicalities that mobilise strategic operations in relation to risk, often in unseen business-to-business contexts. Informed by economic sociology's concepts addressing market assemblage and valuation, alongside applications of science and technology studies to media and communications, the book respects both the powerful roles of social and institutional actors, and affordances of new technologies in dealing with the persistent known unknown - the audience. Examining a persistent business issue in a new way, this book analyses top level industry practice through established mechanisms, and innovations like data analytics. The result is a book that will be essential reading for scholars with an interest in the film business

as well as risk management more broadly.

Research and Practical Issues of Enterprise Information Systems - A. Min Tjoa 2007-11-14

The idea for this conference came from a meeting of the IFIP (International Federation for Information Processing) Technical Committee for Information Systems (TC8) in Guimares, Portugal in June 2005. Our goal is to build an IFIP forum among the different Information Systems Communities of TC8 dealing with the increasing important area of Enterprise Information Systems. In this particular meeting the committee members intensively discussed the innovative and unique characteristics of Enterprise Information Systems as scientific sub-discipline. Hence, in this meeting it was decided by the TC8 members that the IFIP TC8 First International Conference on Research and Practical Issues of Enterprise Information Systems (CONFENIS 2006) would be held in April 2006 in Vienna, Austria. Dr. Li Xu (USA) and Dr. A Min Tjoa (IFIP TC8) were assigned to propose a concept for this conference in order to establish an IFIP platform for EIS researchers and practitioners in the field to share experience, and discussing opportunities and challenges. We are very pleased therefore to have this conference organised by the help of the Austrian Computer Society (OCG). OCG supports the idea of this conference due to the urgent need of research and dissemination of new techniques in this key area. We received 180 papers from more than 30 countries for CONFENIS and the Program Committee eventually selected xx papers or extended abstracts, making an acceptance rate of xx% of submitted papers. Each paper was thoroughly reviewed by at least two qualified reviewers.

Green IT Strategies and Applications - Bhuvan Unhelkar 2011-06-23

Bhuvan Unhelkar takes you on an all-encompassing voyage of environmental sustainability and Green IT. Sharing invaluable insights gained during two battle-tested decades in the information and communication technologies industry, he provides a comprehensive examination of the wide-ranging aspects of Green IT—from switching-off monitors, virtualizing data centers, and optimizing processes to bringing attitude change through training and the use of green metrics for reporting. Combining extensive research, literature review experimentation, and decades of practical consulting experience, Green IT Strategies and Applications: Using Environmental Intelligence is your complete reference for undertaking a successful

Green IT transformation. The environmentally responsible business strategies described in this book include motivators and drivers, transformation phases, management of risks, measuring and reporting of carbon, compliance with the ISO14000 family of standards, and the crucial nexus between Lean and green—resulting in what can be called Environmental Intelligence. This environmentally conscious IT reference delves beyond the corporate responsibilities of organizations in a market-driven economy to demonstrate the importance of carbon management as an integral part of good business management. Increasing profits, reducing costs, applying innovations in business, adhering to government standards, process management, and the socio-cultural aspects of business are all masterfully intertwined with Green IT issues. This book is equipped with case studies from different industrial sectors, including hospital (service), packaging (product), and telecom (infrastructure). It provides a complete suite of strategies, applications, tools, and techniques that will enable you to establish company-wide environmental strategies, a green value system, and the forward thinking required to properly position your organization for the low-carbon economy on the horizon.

Aptamers for Analytical Applications - Yiyang Dong 2019-02-11

An essential guide that puts the focus on method developments and applications in aptamers In recent years, aptamer-based systems have been developed for a wide-range of analytical and medical applications. Aptamers for Analytical Applications offers an introduction to the topic, outlines the common protocols for aptamer synthesis, as well as providing information on the different optimization strategies that can obtain higher affinities to target molecules. The contributors?noted experts on the topic?provide an in-depth review of the characterization of aptamer-target molecule interaction and immobilization strategies and discuss the developments of methods for all the relevant applications. The book outlines different schemes to efficiently immobilize aptamers on substrates as well as summarizing the characterization methods for aptamer-ligand complexes. In addition, aptamer-based colorimetric, enzyme-linked, fluorescent, electrochemical, lateral flow and non-labeling analytical methods are presented. The book also reflects state-of-the-art and emerging applications of aptamer-based methods. This important resource: -Provides a guide to aptamers which provide highly specific and sensitive molecular recognition, with affinities in the range of antibodies and are much cheaper to produce -Offers a discussion of the analytical method developments and improvements with established systems and beyond -Offers a comprehensive guide to all the relevant application areas -Presents an authoritative book from contributors who are noted experts in the field Written for analytical chemists, biochemists, analytical researchers, Aptamers for Analytical Applications is a comprehensive book that adopts a methodological point of view to the important aspects of aptamer generation and modification with a strong emphasis on method developments for relevant applications.
