*The Apex Book of World SF: Volume 1* - Lavie Tidhar 2009  
The Apex Book of World SF, edited by Lavie Tidhar, features award-winning science fiction and fantasy short stories from Asia, Eastern Europe and around the world. The world of speculative fiction is expansive; it covers more than one country, one continent, one culture. Collected here are sixteen stories penned by authors from Thailand, the

Philippines, China, Israel, Pakistan, Serbia, Croatia, Malaysia, and other countries across the globe. Each one tells a tale breathtakingly vast and varied, whether caught in the ghosts of the past or entangled in a postmodern age. Among the spirits, technology, and deep recesses of the human mind, stories abound. Kites sail to the stars, technology transcends physics, and wheels cry out in the night. Memories

come and go like fading echoes and a train carries its passengers through more than simple space and time. Dark and bright, beautiful and haunting, the stories herein represent speculative fiction from a sampling of the finest authors from around the world. Table of Contents: S.P. Somtow (Thailand) — “The Bird Catcher” Jetse de Vries (Netherlands) — “Transcendence Express” Guy Hasson (Israel) — “The Levantine Experiments” Han Song (China) — “The Wheel of Samsara” Kaaron Warren (Australia/Fiji) — “Ghost Jail” Yang Ping (China) — “Wizard World” Dean Francis Alfar (Philippines) — “L’Aquilone du Estrellas (The Kite of Stars)” Nir Yaniv (Israel) — “Cinderers” Jamil Nasir (Palestine) — “The Allah Stairs” Tunku Halim (Malaysia) — “Biggest Baddest Bomoh” Alette de Bodard (France) — “The Lost Xuyan Bride” Kristin Mandigma (Philippines) — “Excerpt from a Letter by a Social-realist Aswang” Aleksandar Žiljak (Croatia) —

“An Evening in the City Coffehouse, With Lydia on My Mind” Anil Menon (India) — “Into the Night” Mélanie Fazi (France, translated by Christopher Priest) — “Elegy” Zoran Živković (Serbia, translated by Alice Coppleson) — “Compartments” Cover art and design by Sarah Anne Langton. Reviews: “From S.P. Somtow’s World Fantasy Award-winning “The Bird Catcher,” a restrained horror tale of a young boy’s friendship with Thailand’s most infamous human “monster,” to “Wizard World,” Galaxy Award winner Yang Ping’s story of high-tech gamers, this extraordinary anthology of 16 tales introduces English-speaking readers to some of the world’s best writers of sf, horror, fantasy, and metafiction. Contributors include Jamil Nasir (Palestine), Aleksandar Žiljak (Croatia), Guy Hasson (Israel), Kaaron Warren (Australia/Fiji), and Jetse de Vries (Netherlands). VERDICT This literary window into the international world of imaginative fiction, the first in

a new series, is sure to appeal to adventurous sf fans and readers of fiction in translation." —Library Journal

"The great thing about Tidhar's collection is that it is full of such masterpieces. You do have to get used to having your mind warped as if by some powerful psychedelic. You'll definitely feel that way after Zoran Zivkovic and his Godot-like explorations. Or after Guy Hassan's thought experiment about the nature of mind and thought. But once you get used to the idea, you can settle in and enjoy the ride." —42SciFi-Fantasy.com, Randy Lazarus

"These stories deserve to be heard!" —Frederik Pohl

*Debating Reform* - Richard J. Ellis 2019-12-20

Getting students away from spouting opinions about highly-charged partisan issues, *Debating Reform*, Fourth Edition looks at key questions about reforming political institutions, with contributed pieces written by top scholars specifically for the volume. Each pro or con essay considers a concrete proposal

for reforming the political system. By focusing on institutions, rather than liberal or conservative public policies, students tend to leave behind ideology and grapple with claims and evidence to draw their own conclusions and build their own arguments. Students will explore how institutions work in their American government text, but this reader helps them to understand how they can be made to work better.

*When I Heard the Learn'd Astronomer* - Walt Whitman  
2004-11-01

Leave time for wonder. Walt Whitman's "When I Heard the Learn'd Astronomer" is an enduring celebration of the imagination. Here, Whitman's wise words are beautifully recast by New York Times #1 best-selling illustrator Loren Long to tell the story of a boy's fascination with the heavens. Toy rocket in hand, the boy finds himself in a crowded, stuffy lecture hall. At first he is amazed by the charts and the figures. But when he finds himself overwhelmed by the pontifications of an academic, he retreats to the great outdoors and does something as universal as the stars themselves... he dreams.

*The Metamorphosis* - Franz Kafka  
2018-06-04

go back to sleep to forget about what has happened. He attempts to roll over, only to discover that he cannot due to his new body-he is stuck on his hard, convex back. He tries to scratch an itch on his stomach, but when he touches himself with one of his many new legs, he is disgusted. He reflects on how dreary life as a traveling salesman is and how he would quit if his parents and sister did not depend so much on his income. He turns to the clock and sees that he has overslept and missed his train to work.

**Radio Frequency and Microwave Electronics Illustrated** - Matthew M.

Radmanesh 2001

Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are

essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and

effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high

power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

*Guns, Germs, and Steel: The Fates of Human Societies (20th Anniversary Edition)* - Jared Diamond 2017-03-07

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped

the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

Scott Momaday 2019-08-15

The Way to Rainy Mountain recalls the journey of Tai-me, the sacred Sun Dance doll, and of Tai-me's people in three unique voices: the legendary, the historical, and the contemporary. It is also the personal journey of N. Scott Momaday, who on a pilgrimage to the grave of his Kiowa grandmother traversed the same route taken by his forebears and in so doing confronted his Kiowa heritage. It is an evocation of three things in particular: a landscape that is incomparable, a time that is gone forever, and the human spirit, which endures.

Celebrating fifty years since its 1969 release, this new edition offers a moving new preface and invites a new generation of

readers to explore the Kiowa myths, legends, and history with Pulitzer Prize-winning author N. Scott Momaday.

will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda

fears most is about to become her reality...

[The Pluto Files: The Rise and Fall of America's Favorite Planet](#) - Neil deGrasse Tyson  
2010-07-12

The New York Times bestseller: "You gotta read this. It is the most exciting book about Pluto you will ever read in your life."  
—Jon Stewart When the Rose Center for Earth and Space at

the American Museum of Natural History reclassified Pluto as an icy comet, the New York Times proclaimed on page one, "Pluto Not a Planet? Only in New York." Immediately, the public, professionals, and press were choosing sides over Pluto's planethood. Pluto is entrenched in our cultural and emotional view of the cosmos, and Neil deGrasse Tyson, award-winning author and director of the Rose Center, is on a quest to discover why. He stood at the heart of the controversy over Pluto's demotion, and consequently Plutophiles have freely shared their opinions with him, including endless hate mail from third-graders. With his inimitable wit, Tyson delivers a minihistory of planets, describes the oversized characters of the people who study them, and recounts how America's favorite planet was ousted from the cosmic hub.

Poetry. In Noel Sloboda's second book of poems, he delves beneath the surface of suburban life, weaving together ancient myths, childhood nightmares, and historical reveries. **OUR RARER MONSTERS** explores intersections between real and

imagined geographies: a residential block where Grendel lives next door and Prospero is parked out in the street. These poems—and the accompanying linocuts by Marc Snyder—plumb the depths of memory to unearth roots that bind us to the literary, cultural, and mythological traditions of yesterday as we hurtle irresistibly through the twenty-first century. "Noel Sloboda's **OUR RARER MONSTERS** is an imaginative book full of wonder and charm."—Jeannine Hall Gailey "I kept coming back to Sloboda's poems and to Marc Snyder's exquisite linocuts included in this utterly winning book. Here is a poetry collection not to be missed for its audacity and

Excerpt: "Now that we are definitely in the process of recovery, lines have been rightly drawn between those to whom this recovery means a return to old methods—and the number of these people is small—and those for whom recovery means a reform of many old methods, a permanent readjustment of many of our ways of thinking and therefore of many of our social and economic arrangements... "
