*Curiosity* - Alberto Manguel 2015-01-01

An eclectic history of human curiosity, a great feast of ideas, and a memoir of a reading life from an internationally celebrated reader and thinker Curiosity has been seen through the ages as the impulse that drives our knowledge forward and the temptation that leads us toward dangerous and forbidden waters. The question "Why?" has appeared under a multiplicity of guises and in vastly different contexts throughout the chapters of human history. Why does evil exist? What is beauty? How does language inform us? What defines our identity? What is our responsibility to the world? In Alberto Manguel's most personal book to date, the author tracks his own life of curiosity through the reading that has mapped his way. Manguel chooses as his guides a selection of writers who sparked his imagination. He dedicates each chapter to a single thinker, scientist, artist, or other figure who demonstrated in a fresh way how to ask "Why?" Leading us through a full gallery of inquisitives, among them Thomas Aquinas, David Hume, Lewis Carroll, Rachel Carson, Socrates, and, most importantly, Dante, Manguel affirms how deeply connected our curiosity is to the readings that most astonish us, and how essential to the soaring of our own imaginations.

**On the East-west Slope** - Attila Melegh 2006-01-01

Melegh's work offers a powerful analysis of the sociological and symbolic meanings of East-West in Europe after the end of the Cold War. While the fundamental poles of East and West remain, both their meaning and their relationship to one another have shifted profoundly since the late 1970s. Melegh exposes the underbelly of liberal characterizations of East-West, highlighting the polarizing effect of extreme

nationalism and ethnic racism. The theoretical underpinnings of this work involve the ideas of preeminent theorists such as Karl Mannheim, Michel Foucault and more recently Maria Todorova and Iver Neumann. This work casts into fine relief how the "East-West Slope" oriented negatively from West to East has emerged from liberal characterizations of this project. The book analyzes the historical change in East-West discourses from a modernizationist type to a new/old civilizational one. In addition, this is one of the first attempts to link post-colonial analysis to developments in Eastern Europe.

*The East Face of Helicon : West Asiatic Elements in Greek Poetry and Myth* - M. L. West 1997-10-23

Over the last sixty years scholars have increasingly become aware of links connecting early Greek poetry with the literatures of the ancient Near East. Martin West's new book far surpasses previous studies in comprehensiveness, demonstrating these links with massive and detailed documentation and showing they are much more fundamental and pervasive than has hitherto been acknowledged. - ;Ever since Neolithic times Greek lands lay open to cultural imports from western Asia: agriculture, metal-working, writing, religious institutions, artistic fashions, musical instruments, and much more. Over the last sixty years scholars have increasingly become aware of links connecting early Greek poetry with the literatures of Mesopotamia, Anatolia, Canaan, and Israel. Martin West's new book far surpasses previous studies in comprehensiveness, demonstrating these links with massive and detailed documentation and showing that they are much more fundamental and pervasive than has hitherto been acknowledged. His survey embraces Hesiod, the Homeric epics, the lyric poets, and Aeschylus, and concludes with an illuminating discussion of possible avenues of transmission between the orient and Greece. He believes that an age has dawned in which Hellenists will no more be able to ignore Near Eastern literature than Latinists can ignore Greek. -

**Indo-European Poetry and Myth** - M. L. West 2008-11-13

The Indo-Europeans, speakers of the prehistoric parent language from which most European and some Asiatic languages are descended, most probably lived on the Eurasian steppes some five or six thousand years ago. Martin West investigates their traditional mythologies, religions, and poetries, and points to elements of common heritage. In *The East Face of Helicon* (1997), West showed the extent to which Homeric and other early Greek poetry was influenced by Near Eastern traditions, mainly non-Indo-European. His new book presents a foil to that work by identifying elements of more ancient, Indo-European heritage in the Greek material. Topics covered include the status of poets and poetry in Indo-European societies; metre, style, and diction; gods and other supernatural beings, from Father Sky and Mother Earth to the Sun-god and his beautiful daughter, the Thunder-god and other elemental deities, and earthly orders such as Nymphs and Elves; the forms of hymns, prayers, and incantations; conceptions about the world, its origin, mankind, death, and fate; the ideology of fame and of immortalization through poetry; the typology of the king and the hero; the hero as warrior, and the conventions of battle narrative.

**Bibliotheca Arabico-Hispana Escorialensis** - Michael Casiri 2008

**Artifacts of the Spanish Colonies of Florida and the Caribbean, 1500-1800** - Kathleen Deagan 2019-08-06

This long-awaited follow-up to Deagan's first volume on ceramics, glassware, and beads focuses on the portable personal objects owned and used by the residents of Spanish colonial America. These objects are not only of Spanish origin; the collection includes many English, French, Dutch, German, Italian, and American pieces as well. Deagan not only provides an authoritative source of identification for these items but also draws extensively on colonial documents, travel accounts, paintings, and museum collections, as well as other contemporary sources to suggest specific functions of the items and the meanings they held for the people who used them. She documents and demonstrates how the objects were made and exchanged in the Americas, and explores how they embody Hispanic cultural identities, attitudes, and belief systems.

*Redefining Translation* - Lance Hewson 2018-10-17

Originally published in 1991 *Redefining Translation* looks at the practical results and theory of translation as a key area for all those investigating language and culture. The book addresses the need to consolidate advances in the field of translation and critically evaluate the variety of conflicting approaches. The book proposes a comprehensive approach to the study of translation, looking at the topic from a theoretical point of view, and provides an applicable approach to the everyday practice of translation.

**Europe** - Norman Davies 1996

From the Ice Age to the Cold War and beyond, from Reykjavik to Riga, from Archimedes to Einstein, Alexander to Yeltsin, here between the covers of a single volume Norman Davies tells the story of Europe, East and West, from prehistory to the present day. The book's absorbing narrative lays down the chronological and geographical grid on which the dramas of European history have been played out. It zooms in from the distant focus of Chapter One, which explores the first five million years of the continent's evolution, to the close focus of the last two chapters, which cover the twentieth century at roughly one page per year. In between, Norman Davies presents a huge and sweeping canvas packed with fascinating detail, analysis, and anecdote. Alongside Europe's better-known stories - human, national, and continental - he brings into focus areas often ignored or misunderstood, remembering the stateless nation as well as the nation-state. Minority communities, from heretics and lepers to Jews, Romanies, and Muslims have not been forgotten. This masterly history reveals not only the rich variety of Europe's past but also the many and rewarding prisms through which it can be viewed. Each chapter contains a selection of telephoto 'capsules',

illustrating narrower themes and topics that cut across the chronological flow. Davies then concludes with a wide-angle 'snapshot' of the whole continent as seen from one particular vantage point. The overall effect is stunning: a kind of historical picture album, with panoramic tableaux interspersed by detailed insets and close-ups. Never before has such an ambitious history of Europe been attempted. In range and ambition, the originality of its structure and glittering style, Norman Davies's Europe represents one of the most important and illuminating history books to be published by Oxford. Time Capsules 201 fascinating articles interspersed throughout the narrative focus on incidents or topics as various as The Iceman of the Alps, Erotic Graffiti at Pompeii, Stradivarius, and Psychoanalysing Hitler. Each capsule can be tasted as a separate self-contained morsel; or can be read in conjunction with the narrative into which it is inserted. Snapshots 12 panoramic overviews across the changing map of Europe freeze the frames of the chronological narrative at moments of symbolic importance, such as Knossos 1628 BC, Constantinople AD 330, and Nuremberg 1945. A fully illustrated history Incorporates over 100 superbly detailed maps and diagrams, and 32 pages of black and white plates.

**Rethinking International Organisation** - Barbara Emadi-Coffin 2003-08-27

The function of the state as a symbol of identity has become increasingly important as major powers of the pre-Cold War era have given way to self-determination. The conventional role of the state has, however, simultaneously been challenged by the process of globalisation which transcends such national boundaries. Barbara Emadi-Coffin seeks to explain this contradiction through a radical new theory. There are now 37,000 multinational corporations in the world, many of which are increasingly seen as being among the new centres of political and economic power. Barbara Emadi-Coffin analyses the increasing interaction of multinational corporations, international organizations and transnational interest groups, such as Greenpeace and Amnesty International, in processes of the global political economy. Using examples of the free trade zones in Korea, the UK and the People's Republic of China, the author demonstrates these interactions. In so doing, she challenges prevailing notions surrounding International Organization theory.

**Reconfiguration of the Global South** - Eckart Woertz 2016-10-04

Since the 1980s there has been a steady shift from West to East in the international system, economically, politically and culturally. Emerging markets in Asia have moved up the value chain of industrial production processes, while the share of Western industrialized countries in global gross domestic product has declined. Countries such as China and India are asserting themselves in security matters and seeking new avenues for investment flows and development co-operation. China's expected shift from export-led growth to domestic consumption might further change patterns of trade and capital flows, and it is an open debate whether the growth dynamics of India might outstrip those of China. While the rise of China and other Asian powers has been studied extensively, much less work has been done on how Africa and Latin America position themselves in this process. What will the role be of Africa and Latin America in the 'Asian Century' and associated reconfigurations of global value chains? Will these regions be able to assert themselves and find a voice of their own? Will they manage to develop industries of their own and diversify trade relations? Will they launch new ways of regional south-south co-operation? What is the role of migrant communities and cultural exchange? Do Western and Asian approaches to these regions differ (Washington vs. Beijing consensus)? This book brings together renowned academics from Africa, Latin America, Europe and the USA, who bring refreshing perspectives on an under-researched topic, ranging from a conceptualization of the issue within new theoretical approaches, to unique case studies based on field work.

**Teaching Translation from Spanish to English** - Allison Beeby Lonsdale 1996

While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.
