A New Perspective on Human Mobility in the South - Rudolf Anich 2014-07-22

This book offers innovative insights on South-South human mobility. It features a collection of papers that highlight often overlooked mobility patterns among and within regions in the global South as well as address critical realities faced by South-South migrants. This publication thoroughly investigates key issues of the migration debate, spanning from the terminological and contextual meaning of migration and development. It also critically examines some of the key features that human mobility in the global South is characterized by, including the prevalence of intra-regional and labor mobility, the role of diasporas communities in developing countries, South-South remittances patterns, the influence of environmental factors on the decision to migrate and the rising number of child migrants. By carefully moving the lens from the frequently examined South-North and North-North movements to human mobility within the Southern regions of the world, this book questions the traditional conception of the migration paradigm. It offers knowledge and insights that will help to expand the debate as well as stimulate further research on this important topic and, hopefully, promote future activities aimed at the protection of migrants and their families living in the South. As a result, it is an ideal resource for migration scholars, policy-makers and development practitioners.

Political Turbulence - Helen Margetts
2017-09-05

How social media is giving rise to a chaotic new

form of politics As people spend increasing proportions of their daily lives using social media, such as Twitter and Facebook, they are being invited to support myriad political causes by sharing, liking, endorsing, or downloading. Chain reactions caused by these tiny acts of participation form a growing part of collective action today, from neighborhood campaigns to global political movements. Political Turbulence reveals that, in fact, most attempts at collective action online do not succeed, but some give rise to huge mobilizations—even revolutions. Drawing on large-scale data generated from the Internet and real-world events, this book shows how mobilizations that succeed are unpredictable, unstable, and often unsustainable. To better understand this unruly new force in the political world, the authors use experiments that test how social media influence citizens deciding whether or not to participate. They show how different personality types react to social influences and identify which types of people are willing to participate at an early stage in a mobilization when there are few supporters or signals of viability. The authors argue that pluralism is the model of democracy that is emerging in the social media age—not the ordered, organized vision of early pluralists, but a chaotic, turbulent form of politics. This book demonstrates how data science and experimentation with social data can provide a methodological toolkit for understanding, shaping, and perhaps even predicting the outcomes of this democratic turbulence.

Framing American Politics - Karen Callaghan and Frauke Schnell, eds. 2005

Most issues in American political life are complex and multifaceted, subject to multiple interpretations and points of view. How issues are framed matters enormously for the way they are understood and debated. For example, is affirmative action a just means toward a diverse society, or is it reverse discrimination? Is the war on terror a defense of freedom and liberty, or is it an attack on privacy and other cherished constitutional rights? Bringing together some of the leading researchers in American politics, *Framing American Politics* explores the roles that interest groups, political elites, and the media play in framing political issues for the mass public. The contributors address some of the most hotly debated foreign and domestic policies in contemporary American life, focusing on both the origins and process of framing and its effects on citizens. In so doing, these scholars clearly demonstrate how frames can both enhance and hinder political participation and understanding.

Maya Achi Marimba Music in Guatemala - Sergio Navarrete Pellicer 2005

For the Achi, one of the several Mayan ethnic groups indigenous to Guatemala, the music of the marimba serves not only as a form of entertainment but also as a form of communication, a vehicle for memory, and an articulation of cultural identity. Sergio Navarrete Pellicer examines the marimba tradition -- the historical confluence of African musical influences, Spanish colonial power, and Indian ethnic assimilation -- as a driving force in the dynamics of cultural continuity and change in Rabinal, the heart of Achi culture and society. By examining the performance and consumption of marimba music as complementary parts of a system of social interaction, religious belief, and ethnic identification, Navarrete Pellicer reveals how the strains of the marimba resonate with the spiritual yearnings and cultural negotiations of the Achi as they try to come to terms with the political violence ...

The History of Media and Communication Research - David W. Park 2008

«Strictly speaking», James Carey wrote, «there is no history of mass communication research.» This volume is a long-overdue response to Carey's comment about the field's ignorance of its own past. The collection includes essays of

historiographical self-scrutiny, as well as new histories that trace the field's institutional evolution and cross-pollination with other academic disciplines. The volume treats the remembered past of mass communication research as crucial terrain where boundaries are marked off and futures plotted. The collection, intended for scholars and advanced graduate students, is an essential compass for the field.
Human Instinct - Lord Robert Winston
2011-05-31

From caveman to modern man ... Few people doubt that humans are descended from the apes; fewer still consider, let alone accept, the psychological implications. But in truth, man not only looks, moves and breathes like an ape, he also thinks like one. Sexual drive, survival, competition, aggression - all of our impulses are driven by our human instincts. They explain why a happily married man will fantasize about the pretty, slim, young woman sitting across from him in the tube and why thousands of people spend their week entirely focused on whether their team will win their next crucial match. But how well do our instincts equip us for the twenty-first century? Do they help or hinder us as we deal with large anonymous cities, stressful careers, relationships and the battle of the sexes? In this fascinating book, Robert Winston takes us on a journey deep into the human mind. Along the way he takes a very personal look at the relationship between science and religion and explores those very instincts that make us human.

Remote Sensing of Large Wildfires - Emilio
Chuvieco 2012-12-06

The book provides a systematic review of the
different applications for remote sensing and
geographical information system techniques in
research and management of forest fires. The
authors have been involved in this field of
research for several years. The book also
benefits from data generated within the
Megafires project, founded under the DG-XII of
the European Union. A clear integration of
research and experience is provided. New data
gathered from fires affecting European countries
between 1991 and 1997 are included as well as
satellite images and auxiliary cartographic
information. Geographic Information System
files have been included in the attached CD-
ROM depicting land cover, elevation, Koeppen
classification climates and NOAA-AVHRR data of
all European Mediterranean Europe at 1 sq km
resolution. All these files are in Idrisi format and
can be easily accessed from any GIS program.
An Idrisi viewer has also been included in the
CD-ROM.

Vestal Fire - Stephen J. Pyne 2012-04-01
Stephen Pyne has been described as having a
consciousness "composed of equal parts
historian, ecologist, philosopher, critic, poet, and
sociologist." At this time in history when many
people are trying to understand their true
relationship with the natural environment, this
book offers a remarkable contribution--
breathtaking in the scope of its research and
exhilarating to read. Pyne takes the reader on a
journey through time, exploring the terrain of
Europe and the uses and abuses of its lands as
well as, through migration and conquest, many
parts of the rest of the world. Whether he is
discussing the Mediterranean region, Russia,
Scandinavia, the British Isles, central Europe, or
colonized islands; whether he is considering the
impact of agriculture, forestry, or Enlightenment
thinking, the author brings an unmatched
insight to his subject. Vestal Fire takes its title
from Vesta, Roman goddess of the hearth and

keeper of the sacred fire on Mount Olympus. But
the book's title also suggests the strengths and
limitations of Europe's peculiar conception of
fire, and through fire, of its relationship to
nature. Between the untamed fire of the
wilderness and the tended fire of the hearth lies
a never-ending dialectic in which human beings
struggle to control natural forces and processes
that in fact can sometimes be directed but never
wholly dominated or contained.

The Fabric of Cultures - Eugenia Paulicelli
2009-06-02

Fashion is both public and private, material and
symbolic, always caught within the lived
experience and providing an incredible tool to
study culture and history. The Fabric of Cultures
examines the impact of fashion as a
manufacturing industry and as a culture industry
that shapes the identities of nations and cities in
a cross-cultural perspective, within a global
framework. The collected essays investigate
local and global economies, cultures and
identities and the book offers for the first time, a
wide spectrum of case studies which focus on a
diversity of geographical spaces and places,
from global capitals of fashion such as New
York, to countries less known or identifiable for
fashion such as contemporary Greece and soviet
Russia. Highly illustrated and including essays
from all over the world, The Fabric of Cultures
provides a comprehensive survey of the latest
interdisciplinary scholarship on fashion, identity
and globalisation.

The Internet Literacy Handbook - Betsy
Burdick 2006-01-01

Over the past decade, Internet technology, now
merging into that of mobile technology, has
transformed the multiple facets of life in society
across the world, changing work and leisure
patterns, and placing greater demands on us as
active, democratic citizens. The Internet literacy
handbook, intended for parents, teachers and
young people throughout Europe, is a guide to

exploiting to the fullest this complex network of information and communication. The handbook is comprised of 21 fact sheets, each covering a particular topic on Internet use, from searching for information to setting up blogs through to e-shopping and e-citizenship. These fact sheets offer teachers and parents sufficient technical know-how to allow them to share young people's and children's voyages through communication technology. They highlight ethical and safety considerations, give insight into added value in education, provide ideas for constructive activities in class or at home, share best practice in Internet use, and provide a wealth of definitions and links to sites that give practical examples and further in-depth information.

Collective Action in Organizations - Bruce Bimber 2012-02-29

Challenging the notion that digital media render traditional, formal organizations irrelevant, this book offers a new theory of collective action and organizing. Based on extensive surveys and interviews with members of three influential and distinctive organizations in the United States - The American Legion, AARP and MoveOn - the authors reconceptualize collective action as a phenomenon in which technology enhances people's ability to cross boundaries in order to interact with one another and engage with organizations. By developing a theory of Collective Action Space, Bimber, Flanagan and Stohl explore how people's attitudes, behaviors, motivations, goals and digital media use are related to their organizational involvement. They find that using technology does not necessarily make people more likely to act collectively, but contributes to a diversity of 'participatory styles', which hinge on people's interaction with one another and the extent to which they shape organizational agendas. In the digital media age,

organizations do not simply recruit people into roles, they provide contexts in which people are able to construct their own collective experiences.

Service Station Angel - Lisa J. Schuster 2013-11

Ernie Price is a middle-aged, humble-hearted man who owns and operates a service station in a rural Midwest town in Upper Michigan, back in a time when full service was the only service, and you got your windows cleaned and your tires pumped for free. Ernie's life has been a reflection of God's love, giving of himself fully and graciously to people in the community and his church. Whether as music director for the children's choir or hosting the yearly Christmas party for the less-fortunate children in town, Ernie impacted lives and was loved by many. When trouble rocks the small town and Ernie is

physically incapacitated to offer his help, the community is left to pick up the pieces, mourn, and move on, while Ernie wrestles with the spiritual questions of his accident.

Vírus Soberano? A Asfixia Capitalista -

Donatella Di Cesare 2021-05-01

O vírus imprevisto suspendeu o inevitável do invariável, interrompendo um crescimento que, entretanto, se tornara uma excrescência incontrolável, desmesurada e sem fim. Toda a crise compromete a possibilidade de resgate. Saberemos compreender o sinal? Um retrato sugestivo do evento epocal que já deixou a sua marca no século xxi. Da questão ecológica ao governo dos especialistas, do Estado de exceção à democracia imunitária, do domínio pelo medo ao contágio da conspiração, do distanciamento forçado ao controlo digital, a autora reconstrói, no seu estilo pessoal, as fases dramáticas daquilo a que ela chama «a catástrofe respiratória». O coronavírus é um vírus soberano que contorna os muros do patriotismo e as fronteiras arrogantes dos soberanistas. E revela em toda a sua terrível crueza a lógica imunitária que exclui os mais pobres e os mais fracos. A disparidade entre os protegidos e os desamparados, que desafia qualquer ideia de justiça, nunca foi tão flagrante. O vírus pôs a descoberto a crueldade do capitalismo e mostrou que é impossível salvar-nos sem ajuda recíproca, obrigando-nos a conceber uma nova forma de coabitação. Já nem a respiração pode ser dada como adquirida.

Excellent 11 - Ron Clark 2004-08-01

When *The Essential 55* was published, Ron Clark became a tireless promoter, traveling the country to speak to large groups of teachers and fans. And when his Oprah appearance shot the book onto the New York Times bestseller list, he kept the heat on. We can expect the same tenacious commitment to promoting his follow-up book, *The Excellent 11*. *The Excellent 11* contains eleven sections, with each one focusing on a theme directly related to teaching and raising children. Ron Clark draws from his own experience to give advice, telling personal stories that demonstrate the significance of each theme within the learning environment--an environment that extends beyond the classroom and into the larger world. From the author of *The Penguin State of the World Atlas*, an essential tool for understanding the modern Middle East. The Middle East is in a constant state of change, and understanding it has never been more important. Sedimentary Processes on the Amazon Continental Shelf - Charles A. Nittrouer 1987
Hardbound. A compilation of the most recent

research. It examines a wide range of factors affecting sediments as part of a multi-disciplinary investigation, including studies of sedimentology, geochemistry, physical oceanography, and benthic biology. The Amazon River discharges enormous amounts of particulate and dissolved material to the continental shelf. Knowledge about the fate of this material is relevant to understanding sedimentary processes at the interface between major rivers and the ocean and to interpreting similar shelf environments preserved in the stratigraphic record. The uniqueness of this volume results from the multi-disciplinary and interactive nature of the research, and from the major importance of the Amazon dispersal system.

Men in My Situation - Per Petterson 2022-02-01

Toleration, Diversity, and Global Justice - Kok-Chor Tan 2015-11-05

The "comprehensive liberalism" defended in this book offers an alternative to the narrower "political liberalism" associated with the writings of John Rawls. By arguing against making tolerance as fundamental a value as individual autonomy, and extending the reach of liberalism to global society, it opens the way for dealing more adequately with problems of human rights and economic inequality in a world of cultural pluralism.
