*Excel with VBA* - Francis Hauser 2015-06-29

This book was born when dynamic systems analyst Francis Hauser, PhD, discovered the power of this well-integrated programming platform. He realized how helpful this would have been to him as a student and as a practicing engineer and university teacher. He decided "this has got to be told." From this book, the reader can expect to be writing computer programs using Microsoft Office Excel with VBA. This book defines and demonstrates VBA syntax incrementally using example programs that range from common math problems like finding roots of polynomials to more advanced problems like finding eigenvalues of general matrices using the QR algorithm. Example programs with complete code listings cover the following topics: Roots of polynomials Linear algebraic equations Runge-Kutta numerical integration 3D object rotation Newton-Raphson for nonlinear equations Linearizing equations State variable form of equations Eigenvalues via the QR algorithm Transfer functions via the QR algorithm Frequency response Root locus Dantzig's Simplex Algorithm Discrete Fourier transform These code listings are explained by in depth tutorials on the topics, and include checkout methods learned from experience. This guidebook will help you as an engineer, mathematician, or student using nothing more than the Microsoft Office suite that many are already familiar with. The book is for PCs and Macs.

bookdown - Yihui Xie 2016-12-12

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Dari Catatan Keuangan jadi Laporan Laba Rugi - Lilis Setiawati 2014-04-24

""Mengelola usaha tanpa mengetahui laba atau rugi, sama dengan seseorang yang berkendara tanpa panel dashboard yang berfungsi. Kita tidak tahu sisa bahan bakar dalam tangki, tidak tahu berapa kilometer kita

sudah berkendara sehingga kita tidak tahu kapan harus ganti oli atau harus menjalani servis rutin. Memang ajaib, kenyataannya, banyak usaha kecil yang bisa terus bertahan (dan bahkan berkembang) tanpa tahu laba rugi usaha mereka. Sementara itu, ada juga pengusaha yang bingung, sekalipun penjualan dan produksi terus berjalan dengan baik, tetapi pemilik harus terus-menerus menambah dana segar ke dalam perusahaan. Dalam hati, pemilik bertanya-tanya apakah sebenarnya perusahaan ini menguntungkan? Hal ekstrim yang lain, ada juga usaha yang hancur (collapse) karena pemilik ternyata telah mengambil uang lebih dari laba yang bisa dihasilkan oleh perusahaan tersebut. Yang berarti, pemilik tanpa sadar, secara perlahan terus mengurangi modal usaha perusahaan mereka sendiri. Andai para pemilik ini tahu laba rugi usaha mereka, mereka akan tahu apa yang seharusnya mereka lakukan. Dalam buku ini, penulis menyajikan kasus komprehensif bagaimana mencatat transaksi penjualan, pembelian, pembayaran beban, dan lain sebagainya hingga akhirnya pemilik usaha dapat menghitung laba rugi usaha. Sebagai bonus, penulis juga menyajikan ragam laporan internal dengan memanfaatkan tabel pivot Excel, seperti laporan penjualan per salesman (sehingga mudah bagi pengelola usaha untuk menentukan komisi setiap sales) dan laporan laba kotor per produk (sehingga pengelola usaha tahu, produk mana yang sebenarnya menguntungkan, dan ada tidak produk yang sebenarnya tidak menguntungkan alias merugikan).""

Given the exponential growth of social media in contemporary society, it has become an essential tool for communication, content sharing, and collaboration. This growth and these tools also present an unparalleled opportunity to implement a transparent, open, and collaborative government. However, many government organization, particularly those in the developing world, are still somewhat reluctant to leverage social media, as it requires significant policy and governance changes, as well as specific know-how, skills and resources to plan, implement and manage social media tools. As a result, governments around the world ignore or mishandle the opportunities and threats presented by social media. To help policy makers and governments implement a social media driven government, this book provides guidance in developing an effective social media policy and strategy. RAB (Rencana Anggaran Biaya) bangunan atau konstruksi merupakan perkiraan biaya yang dihitung berdasarkan gambar rencana bangunan. Penyusunan RAB sangat diperlukan sebagai pedoman agar biaya riil tidak terlalu jauh dari biaya perkiraan. Estimator (orang yang menghitung RAB) pada umumnya membuat RAB menggunakan Excel secara manual, yaitu dengan mengelompokkan data, membuat formula-formula, menghubungkan masing-masing data dalam link, dan masih banyak lagi yang harus dikerjakan secara manual. Padahal, ketepatan, kecepatan, dan keakuratan hasil perhitungan RAB secara manual akan sangat bergantung pada kecakapan atau kemahiran estimator dalam menggunakan Excel. Buku Membuat Aplikasi RAB Bangunan dengan Macro Excel - Edisi Revisi berisi panduan langkah demi langkah pembuatan aplikasi RAB bangunan siap pakai menggunakan Macro Excel. Pada edisi revisi kali ini, penulis menambahkan cukup banyak fitur penting dalam aplikasi. Fitur dalam aplikasi RAB selengkapnya adalah:

- Apabila ada perubahan harga sumber daya proyek, perhitungan AHS secara otomatis akan ter-update.
- Perhitungan RAB lebih mudah dan cepat karena diambil lang-sung dari database sumber daya proyek atau dari database AHS yang sudah ada.
- Omzet RAB yang bisa ditangani tidak terbatas.

**Enter the Animal** - Teya Brooks Pribac 2021-02-01

Historically, grief and spirituality have been jealously guarded as uniquely human experiences. Although non-human animal grief has been acknowledged in recent times, its potency has not been recognised as equal to human grief. Anthropocentric philosophical questions still underpin both academic and popular discussions. In *Enter the Animal*, Teya Brooks Pribac examines what we do and don't know about grief and spirituality. She explores the growing body of knowledge about attachment and loss and how they shape the lives of both human and non-human animals. A valuable addition to the vibrant interdisciplinary conversation about animal subjectivity, *Enter the Animal* identifies conceptual and methodological approaches that have contributed to the prejudice against nonhuman animals. It offers a compelling theoretical base for the consideration of grief and spirituality across species and highlights important ethical implications for how humans treat other animals.
