Exceptionally Gifted Children is unique. The first edition of this book, published in 1993, introduced 15 remarkable children, some of the most gifted young people ever studied, and traced their path through school, exploring their academic achievements (and in some cases enforced underachievement), their emotional development, their social relationships and their family relationships and upbringing. This new edition reviews these early years but also follows the young people over the subsequent ten years into adulthood. No previous study has traced so closely and so sensitively the intellectual, social and emotional development of highly gifted young people. This 20 year study reveals the ongoing negative academic and social effects of prolonged underachievement and social isolation imposed on gifted children by inappropriate curriculum and class placement and shows clearly the long lasting benefits of thoughtfully planned individual educational programs. The young adults of this study speak out and show how what happened in school has influenced and still influences many aspects of their lives. Miraca Gross provides a clear, practical blueprint for teachers and parents who recognise the special learning needs of gifted children and seek to respond effectively. University English for Academic Purposes in China - Xiaofei Rao 2018-07-07

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an

academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.

Engaging in Narrative Inquiry - D. Jean Clandinin 2016-06-16

Narrative inquiry examines human lives through the lens of a narrative, honoring lived experience as a source of important knowledge and understanding. In this concise volume, D. Jean Clandinin, one of the pioneers in using narrative as research, updates her classic formulation on narrative inquiry (with F. Michael Connelly), clarifying, extending and refining the method based on an additional decade of work. A valuable feature is the inclusion of several exemplary cases with the author's critique and analysis of the work. The rise of interest in narrative inquiry in recent years makes this an essential guide for researchers and an excellent text for graduate courses in qualitative inquiry.

Fostering Academic Excellence - J. McLeod 2013-10-22

This book contains a general introduction to the

education of academically able students. It provides a solid background of basic knowledge and a survey of research and theory for educational theorists, student teachers, practising teachers, administrators and planners. It offers insights into relevant practical problems as well as guidelines for classroom practice. The significance of this material is outlined for the various levels of the educational system from the individual classroom to the regional planning level. The book is not, however, designed to offer set answers and pat solutions, but to provide rationale for the creative work of teachers and administrators.
