Morphology - John T. Jensen 1990-01-01

A self-contained and lively text prepared in response to a perceived need for an up-to-date introduction to the field of morphology within the framework of generative grammar. The

material is presented in the framework of the lexicalist hypothesis of Chomsky (1970), but also taking in the more recent development of lexicalist phonology and morphology in the works of Paul Kiparsky and others. Other

approaches are recognized, but the use of one unified, consistent theory pushed to its limit makes for a better student text. Each chapter includes a list of terms, of further reading, and a number of exercises. The volume is completed by an index.

Sapiens - Yuval Noah Harari 2015-02-10
New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which

biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past

four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

English Text - J.R. Martin 1992-11-18

This book is a comprehensive introduction to text forming resources in English, along with practical procedures for analysing English texts and relating them to their contexts of use. It has been designed to complement functional grammars of English, building on the generation of discourse analysis inspired by Halliday and Hasan's Cohesion in English. The analyses presented were developed within three main theoretical and applied contexts: (i) educational linguistics (especially genre-based literacy programmes) (ii) critical linguistics (as manifested in the development of social semiotics) and (iii) computational linguistics (in dialogue with the various text generation projects based on systemic approaches to grammar and discourse). English Text's major contribution is to outline one way in which a rich semantically oriented functional grammar can be systematically related to a theory of discourse semantics, including deconstruction of contextual issues (i.e. register, genre and

ideology). The chapters have been organized with the needs of undergraduate students in theoretical linguistics and postgraduate students in applied linguistics in mind.

SKGB 022: BUDAYA LITERASI - Kampus Guru Cikal & Komunitas Guru Belajar 2019-08-28

Membaca Apa? Ketika kita bersepakat bahwa literasi bukan sekedar kemampuan membaca buku, maka upaya mengembangkan literasi tidak melulu proses membaca buku. Pada suatu hari saya diundang menjadi pembicara diskusi daring di Komunitas Guru Belajar di sebuah daerah. Selesai diskusi, ada salah satu peserta yang japri untuk mengajukan pertanyaan. ...ttg praktik pak buki yg mengajar literasi dengan tanpa perlengkapan apa2. Njenengan beberapa hari yg lalu menjelaskan bahwa anak2 membaca batang pohon, membaca komposisi sampah, atau

membaca susunan dan bentuk gedung.. Teknisnya bagaimana pak? Sama sekali blm terbayangkan dalam pikiran saya, bagaimana anak membaca batang pohon, kemudian mendapat pengetahuan dari sana, tidak juga terbayangkan bagaimana mereka mengolah dan menggunakan pengetahuan tsb... Apakah Anda punya pertanyaan serupa? Sebenarnya pertanyaan tersebut wajar ditanyakan, terutama bila selama ini terbiasa mengajar sebatas di ruang kelas dan mengacu hanya pada buku teks pelajaran. Belajar adalah menguasai suatu kompetensi pada sebuah situasi yang digunakan dalam suatu situasi kehidupan nyata. Perhatikan ada dua kata situasi pada kalimat tersebut. Situasi belajar dan situasi kehidupan. Situasi belajar, situasi dimana anak mendapatkan kompetensi. Situasi kehidupan, situasi dimana anak menggunakan kompetensi. Pendidikan berhasil bila anak bisa melakukan transfer dari situasi belajar ke situasi kehidupan. Masalahnya, kebiasaan pendidikan kita memisahkan begitu

jauh antara situasi belajar dengan situasi kehidupan secara ruang maupun waktu. Kata anak zaman now, pendidikan membuat situasi belajar dan situasi kehidupan jadi LDR-an. Contoh sederhana. Anak belajar menguasai penjumlahan. Situasi belajar: buku teks atau LKS. Kapan anak menggunakan penjumlahan dalam situasi kehidupan? Seringkali anak tidak mendapat kesempatan dan arahan untuk menggunakannya. Penggunaan penjumlahan seringkali terjadi secara insidental. Bila orangtua peduli dan mempunyai kesadaran dalam mendidik maka sang anak beruntung karena segera mendapat stimulus dan kesempatan menggunakan kemampuan menjumlah pada situasi kehidupan. Biasanya pada kebanyakan lingkungan pendidikan kita, semakin kompleks kompetensi yang dipelajari maka semakin jauh jarak antara situasi belajar dengan situasi kehidupan. Kompetensi seperti kreativitas, empati, atau pengambilan keputusan. Bahkan banyak anak sampai 18 tahun lebih bersekolah

pun, tidak mendapatkan kesempatan mendekatkan jarak antara situasi belajar dengan situasi kehidupan. Padahal menghubungkan situasi belajar dan situasi kehidupan tidak lah sulit. Tidak butuh modal besar. Tidak butuh fasilitas mewah. Apa yang dibutuhkan? Guru merdeka belajar. Guru yang mengajar bukan sekedar mematuhi kurikulum dan arahan dari atasan, tapi mengajar dengan berorientasi pada anak. Guru yang peduli pada kualitas pengalaman belajar anak. Guru merdeka belajar akan mencari cara bagaimana menghubungkan kompetensi yang menjadi tujuan belajar dengan kehidupan nyata. Bagaimana penjumlahan digunakan anak dalam beragam konteks, rumah, kebun, sawah, jalan atau pasar? Semisal, guru memberi tugas pada anak untuk mengenali bunga yang menarik di kebun dan menghitung jumlahnya. Guru memberi tugas mengenali berapa corak di sebuah batang pohon dan membuat kategori corak pohon. Setelah panjang lebar, baru ketemu jawaban membaca batang

pohon? Huruf dan angka adalah perkakas buatan manusia yang digunakan untuk mengumpulkan, mengolah dan menggunakan pengetahuan yang didapatkan dari pengamatan maupun dari imajinasi. Energi adalah perkalian massa dengan kecepatan kuadrat adalah hasil imajinasi Einstein yang berawal dari pertanyaan bagaimana jadinya bila kita duduk di ujung cahaya yang melintasi semesta. Tekanan adalah hasil pembagian gaya dengan luas penampang berawal dari pengamatan Newton terhadap apel yang jatuh dari pohon. Teori tahap perkembangan anak berawal dari pengamatan Piaget terhadap tumbuh kembang anaknya. Sayangnya, anak-anak kita dituntut menguasai pengetahuan hasil imajinasi dan pengamatan orang lain, tapi tidak mendapat kesempatan berimajinasi dan melakukan pengamatan fenomena di lingkungan sekitar. Jadi, penting mengembalikan literasi menjadi sesuatu yang bermakna bagi anak dan kehidupannya. Beri kesempatan berimajinasi. Beri kesempatan

melakukan pengamatan. Minta mereka mewujudkan hasil imajinasi dan hasil pengamatan dalam bentuk nyata, menggunakan gambar, suara, gerak, maupun huruf dan angka. Dengan cara berpikir demikian, maka program literasi bisa menjadi jauh lebih kreatif. Program literasi tidak lagi semata menjadi urusan kekurangan fasilitas atau buku penunjang. Program literasi menjadi sesuatu yang berakar pada kebiasaan sehari-hari dan melekat pada lingkungan sekitar. Pada titik tersebut, program literasi adalah pintu masuk menuju terbentuknya budaya literasi. Literasi yang dipraktikkan sehari-hari. Surat Kabar Guru Belajar Edisi ke-22 ini menampilkan tulisan Guru Merdeka Belajar yang mempraktikkan pengajaran literasi yang melekat pada lingkungan sekitar. Pengajaran literasi yang mensyaratkan kreativitas dan bukan fasilitas yang dimiliki sekolah. Ada banyak contoh nyata yang bisa menjadi sumber inspirasi buat Anda untuk menjadi bagian dari Guru Merdeka

Belajar Silahkan ambil minuman dan kudapan, cara posisi nyaman dan nikmati Surat Kabar Guru Belajar yang disusun oleh guru untuk guru. Bila bermanfaat, pastikan dipraktikkan dan disebarakan ke rekan guru yang lain. Jadi, membaca apa kita hari ini? Salam merdeka belajar!

Interactive Language Teaching -

Wilga M. Rivers 1987-02-27

In this collection of essays, a distinguished group of innovative teachers and writers describe the approaches and techniques they have incorporated into their own teaching. The articles are designed to help classroom teachers

make language classes more participatory and communication oriented. Successive articles deal with the structure of interaction in large and small groups: imaginative activities for listening, speaking, reading, writing, and testing; the use of poetry, song, and drama; how to perform grammar rules rather than recite them; the special contribution of authentic materials; using audio and video as well as computer software to enhance learning, tapping the community as a resource; learning to interact in different cultural styles; and preparing the student for real-life professional use of language. Teachers of any language and teachers in training will find in this volume a wealth of original and practical ideas for the classroom.

7 Keys to Comprehension - Susan Zimmermann
2008-06-03

It's simple: If children don't understand what they read, they will never embrace reading. And that limits what they can learn while in school. This fact frightens parents, worries teachers, and ultimately hurts children. *7 Keys to Comprehension* is the result of cutting-edge research. It gives parents and teachers—those who aren't already using this valuable program—practical, thoughtful advice about the seven simple thinking strategies that proficient readers use:

- Connecting reading to their background knowledge
- Creating sensory images
- Asking questions
- Drawing inferences
- Determining what's important
- Synthesizing ideas
- Solving problems

Easily understood, easily applied, and proven successful, this essential educational tool helps parents and teachers to turn reading into a fun and rewarding adventure.

Methodology in Language Teaching - Jack C. Richards 2002-04-08

This comprehensive anthology provides an overview of current approaches, issues, and practices in the teaching of English to speakers of other languages. Containing a broad collection of articles published primarily in the last decade, it illustrates the complexity underlying many of the practical planning and instructional activities involved in teaching English. These activities include teaching English at elementary, secondary, and tertiary levels, teacher training, language testing, curriculum and materials development, the use of computers and other technology in teaching, as well as research on different aspects of second-language learning. Organized into 16 sections, the book contains 41 articles by well-known teacher trainers and researchers. Also included are two sets of discussion questions—a pre-reading background set and a post-reading reflection set. The anthology serves as an

important resource for researchers, M.A. TESOL students, and teachers wishing to design a basic course in methodology.
